STEP 10 - Choose the <u>BEST</u> way to make a full time income online	60

# STEP 1 - Choose Your Starting Point

I'm Zack and I'd like to thank you first off for your time. It's valuable, that's why - unlike the scams and gimmicks out there - I won't confront you with a shiny object & months and months of failure...

**Whether you are starting out or have experience with making money online, most people misunderstand what it takes to succeed.**

See, there are TONS of ways to make money. Other ways than this one, I'll even admit! But it's not the PRODUCT that makes you money, it's the foundational PRINCIPLES and proper guidance that makes sales. This is not just another product. It's a method built on principles you can apply to any business. What's that mean?

Well, products tend to OVERCOMPLICATE the process of earning so they can pitch you something. And it makes newbies and even seasoned marketers get lost in the weeds. Many times it causes people to focus on one unnecessary thing for years, while they wonder why they aren't earning what they dreamed of.

**This book doesn't do that.**

In 4 hours you'll have a strong foundation built on money-making principles you can REPEAT to earn daily.

**This works! So make like Nike and "Just Do It!"**

Some of you might have seen or heard of some of what I'm going to show you, but I can bet you didn't do it this way. If you apply these principles daily with patience, understanding WHY we do it this way, then, even if the money doesn't come in 5 minutes, it will come.

So please pay close attention to this book and put it into ACTION.

**Speaking of taking action, below is your first task:**

## Choose The Right Starting Point

First off, pick one of these 3 options:

- **OPTION A:** If you **already have a business**, you can skip to [STEP 4](#).
- **OPTION B:** If you **don't have a business**, you can start one for free 🙌 [CLICK HERE](#).

- This will take only 5 minutes. THEN, you can *skip to* [STEP 4](#).
- **OPTION C:** Those that want to **start from scratch**, *CONTINUE READING* these next 2 steps. We're going to build you an ENTIRE business that revolves around what you're passionate and knowledgeable about - and get you caught up with the others!

# **STEP 2 - Find a PROFITABLE Market You're PASSIONATE About to Make Full Time, Passive Income**

**(Time To Complete This Module: Approx 30 minutes)**

In this chapter I'm going to show you how to find an EXTREMELY profitable market you can build an entire business around.

When you do this, you're gonna LOVE what you do, your passion will resonate in your work, and as a result, you're going to attract MORE people and make MORE sales.

So take massive action!

**Before we get into the training, I want to give you a quick heads up on something...**

Basically, for a limited time, I'm giving away \$1,497+ of my BEST training & tools absolutely FREE. This will work on your current business or even if you don't have one.

I'm giving away TRAINING, WEBSITES, TRAFFIC, LEAD PAGES, & **SALES COPY** for free!

**But that's only the tip of the iceberg...**

I ALSO show you how I generated \$7,564.56 in the last 29 days, as well.

But like I said, it's extremely time limited and once it's gone, it's gone for good.

So if you want in, make sure to give that button **below** a click!

But Wait – Before You Continue...

## Discover How To Get Over \$1,497 Of My BEST Tools & Training Absolutely FREE

But Hurry – This FREE Offer Is Only Available For a Limited Time

- ➔ Free Monthly Traffic - Value: \$99 - Yours FREE
- ➔ Free Link Tracker, Page Builder, Affiliate Program, Autoresponder - Value: \$1,000 - Yours FREE

- ➔ The Overnight Cash Hack System - Value: \$97 - Yours FREE
- ➔ Emergency Fast Cash Blueprint - Value: \$97 - Yours FREE
- ➔ Safelist Marketing Tactics Ebook & Resell Rights - Value: \$97 - Yours FREE

And MORE....

Now let's get this training started:

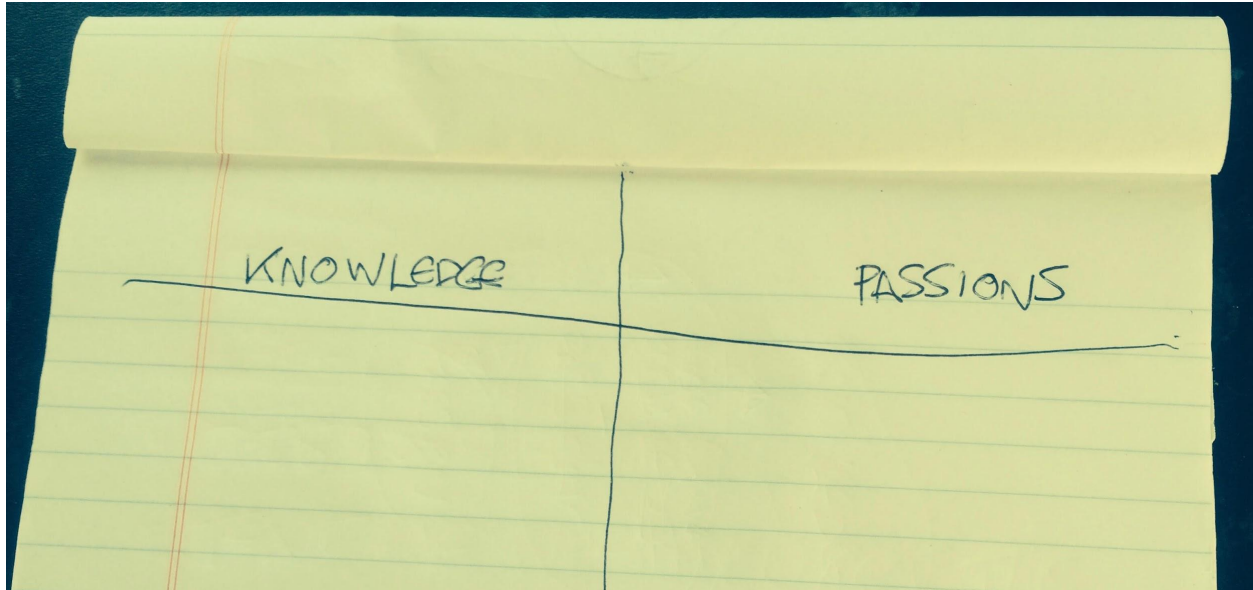

### Part 1: Brainstorming Ideas

The first thing we need to do is get a pen and piece of paper.

We then need to draw a line down the middle - from top to bottom.

And at the top of each side I want you to write "Knowledge" and "Passions".

Here's a pic to give you an idea of what I mean:

Next, what I want you to do is write down every single thing you're somewhat knowledgeable about.

**Now the keyword here is "somewhat." I don't expect you to be an authority, expert or a Guru on the subject.**

So anything you've dabbled in the past, write it down - no matter how obscure or weird it is.

And don't be too broad either...

For example, if you're into sports, don't just write down "sports", write down which sport you're into.

Stuff like:

- Football
- Golf
- Basketball
- Cricket
- Tennis

Another example is "computers" as it's way too broad.

So once again, drill down to specifics like:

- Gaming
- Photoshop
- Fixing Computers

- Video creation/editing
- Overclocking

You get the idea.

To give you some guidance, I've written down some of the stuff I'm knowledgeable about:

- Running
- Dieting
- Gaming
- Photoshop
- Bricklaying
- Fixing Computers
- Video Creation/Editing
- Bodybuilding
- Painting and Decorating
- Overclocking

Now what you do is fill out the "Passions" column with everything you're passionate about.

You know, stuff you do in your spare time, like your hobbies and what you generally enjoy doing in life.

Once again, you can see what I wrote down to get an idea of what you can put down yourself:

- Running
- Gaming
- Fixing Computers
- Video Creation/Editing

Once you've filled out your "Knowledge" and "Passions", what we're looking at here are potential markets you can enter.

Now the trick here is to find a market that appears in BOTH your "Knowledge" and "Passions" columns.

**If you've got a market that appears in both columns, then congratulations... You've found a potential market you're knowledgeable AND passionate about!**

And believe me, this is going to make your life A LOT easier!

Like I said before - when you can enter a market you're knowledgeable AND passionate about, it'll give you a massive head-start as you're already knowledgeable on the subject.

Also, your passion will resonate in the content you create - and as a result - you'll attract MORE people to your business and make more sales and commissions with a lot less effort too.

Now this is awesome and all... But is it a profitable market?

Well, before I get to that, I need to cover a small hurdle some of you may be facing...

## **What To Do If No Markets Showed Up In Both Columns?**

So no market showed up in both columns, eh?

No big deal.

In fact, there's a few things we can do to easily fix this issue.

### **Here's What You Can Do:**

1. Did you try hard enough when brain-storming ideas for your "knowledge" and "passions" columns?

Generally, people put minimum effort into this and miss out on tons of ideas as a result.

Don't be that person!

Go back and brain-storm more ideas - no matter how weird or strange they are... One of them could be a wildly profitable market.

2. If you gave #1 all you got and still nothing appeared in your "knowledge" and "passions" columns, then simply pick one from any column and move onto the next part.

At the end of the day, I just want you to find a market you're knowledgeable AND passionate about.

Like I keep saying, it'll make your life a lot easier, that's all.

But if that's not the case, then we can just work with what you've got on your list, instead.

Anyway, moving on...

## **Part 2: Yeah But... Is It a Profitable Market?**

So you've found something you're knowledgeable and passionate about.

That's awesome, but the big question is... Is it a profitable market?

After all, you don't want to waste your time in a market, only to find out there's no money to be made.

**So what we need to do is to "qualify" the market to see whether it's profitable or not.**

To do this, we're gonna use a system I like to call the "yes" system.

Basically the more "yes's" you get... The MORE profitable the market is.

If this sounds brain-dead simple to you, that's because it is!

Anyway, here's what you've got to do, my friend...

## **Step 1: Affiliate Networks**

One of the best ways to gauge the profitability of a market is through affiliate networks.

Now before we do this - some affiliate networks tend to unintentionally cater to different markets.

**So what do I mean, exactly?**

Well, some affiliate networks tend to cater more toward "internet marketing" related products.

You know, courses on how to make money online, SEO and stuff like that.

So if you're researching to see whether any of those kinda markets are profitable, then the best affiliate networks are these ones:

- [JVZoo.com](http://JVZoo.com)
- [Warriorplus.com](http://Warriorplus.com)

There's more, but that's more than enough to get you going.

Now if you're going into a more traditional market, then [Clickbank.com](http://Clickbank.com) would be your best bet.

**When I say "traditional" market, I mean anything vaguely related to:**

- Weight loss
- Bodybuilding
- Fishing
- Gardening
- Seduction
- Getting your ex back
- Anything "computer" related
- DIY how-to courses
- Gambling
- Anything "sport" related
- Dieting
- Cooking

Basically, everything except "internet marketing"-related stuff, really.

Okay, now that we've got that out of the way, and you know which affiliate network to do your research in, here's how to find out whether your market is profitable or not:

First up, head over to the affiliate network that caters to your market.

**Then look for the following:**

1. Do they sell products related to your market?
2. If yes, how many? (the more products sold on the network, the more profitable the market is)
3. Have new products been added recently? (The more recent, the better)

And that's it, but what we're looking for, is a big, thriving market, where people are making money everyday selling this kind of information.

So the bigger and more thriving the market... The more profitable it is.

Now after all that, you're probably thinking...

**"Isn't There Going To Be Tons of Competition?"**

And yeah, you'd be right, but here's the thing...

The MORE competition in the market... The MORE profitable the market is.

I know this flies in the face of what every other marketer tells you.

But get this...

**These marketers don't even follow their own advice - otherwise they wouldn't be selling in the "internet marketing" niche as it's one of the most competitive niches, out there.**

So don't listen to people who don't follow their own advice!

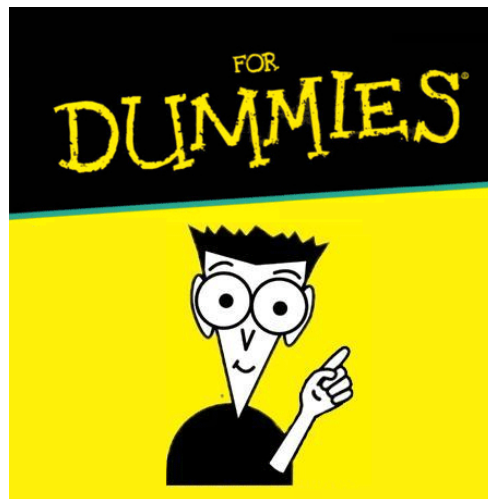

Secondly, These are PROVEN markets where people WANT to invest in products - hence all the competition.

So don't be afraid of competition. Instead, learn to love and embrace it...

Trust me, it'll pay off MASSIVELY in the long run!

Another way of finding out if your market is profitable, is using what I like to call...

## Step 2: The Dummies' Method

Who'd a thought you would be listening to a dummy for marketing advice?

Well, that's exactly what we're going to do here

Let me explain....

Have you ever seen those books?

The "For Dummies" ones?

They have a ton of books called "The Dummies Guide To \_\_\_\_\_".

Well, despite their name, these guys know what they're doing - especially when it comes to market research.

You see, it costs thousands to:

- Research a topic
- Hire writers
- Manufacture thousands of books
- Execute publishing deals

...And this is before they've made a single cent!

**So dummies - when they bring out a new book - they've got to make sure there's a big demand and people are willing to pay for that kinda information in that market.**

Otherwise, they'll lose thousands - maybe millions.

And I don't think Dummies are in business to lose money, do you?

So how can we use Dummies to find profitable markets?

It's mind-blowingly easy to do.

Basically, if they've got a book on your market subject... That's a major indicator that it's a wildly profitable market.

**So all you've got to do is:**

1. Head over to [Dummies.com](http://Dummies.com)
2. Put in your market keyword, like fishing, bodybuilding, weight loss etc in the search bar.
3. Then see if they're selling physical books on the subject.

If yes, that's awesome...

This is another indicator your market is indeed profitable.

Okay, once you've done that, I have some good news...

**Congratulations... You've Completed Today's Training :-)**

Take a little breather before you jump into chapter 2.

While you do...

## How Would You Like To Get Instant Access To My Secret "\$1K a Day" Formula?

**Quick question:** do you want to learn how to make a full time, passive income in the quickest and easiest way possible?

If so, then I have something very special for you...

For a limited time, I'm going to share something I like to call, the "\$1K a day" formula.

Seriously, this is really powerful stuff and I think it'll blow your mind when you see it.

**In fact, when you click the button below, you'll see how I made over \$7,564.56 in the last 29 days using this little ol formula.**

But here's the best part... Anyone can get results with this - even complete beginners. **As well as people with their own online business!**

Everything is laid out in an easy to follow "step by step" manner anyone - regardless of experience - can implement.

So if you want in on this, click the button below.

# **STEP 3 - Find HIGH Converting Offers That Pay MASSIVE Commissions Your Market Will LOVE and Buy WITHOUT Hesitation**

**(Time To Complete Today's Training: Approx 40 minutes)**

Now that we found you a market that revolves around what you're passionate and knowledgeable about, our next step in global domination is to find you a product to promote in your market!

**So in today I'm going to show you how to find extremely profitable products that are in MASSIVE demand and pay you HUGE commissions.**

## **Part 1: Finding your MOST Profitable Segment Of Your Market**

When looking for a product to promote, you need to find a product that applies to the MOST profitable segment of your market.

**If we go too "niche" or target the wrong segment of your market... Then it's going to GREATLY diminish the money you can make.**

So here's the 3 factors for finding the largest segment of your market:

### **1. The Beginner Crowd:**

The LARGEST and most ACTIVE segment of a market are the "beginner" crowd.

This is because they go on a "buying frenzy" as they are new to the market and need to buy all the tools/information to succeed in the chosen subject.

**Take Golf for example - people who take up Golf have to buy:**

- Golf clubs
- Gloves
- Golf bags
- Membership to a golf club
- Books, guides and courses
- Golf balls

And believe it not, all this adds up to thousands.

Hence why beginners are really profitable in this respect.

However, more experienced golfers on the other hand, are already kitted out with all the golf clubs, paid memberships to golf clubs etc so we would miss out on A LOT of potential sales as a result.

**Also, beginners are EASIER to sell to because they're less knowledgeable on the subject, and therefore, easier to impress.**

## 2. Desperates:

Now this isn't going to apply to every market but if it applies to yours... Then you need to find products that target the desperate people in your market.

**DESPERATE  
PEOPLE DO  
DESPERATE  
THINGS.**

Once again, take Golf as an example - nobody is in dire need to get there golf clubs right now, are they?

But if you've chosen a market with lots of desperate people, like the "make money online" or the "get your ex back" market, then you'll find these kind of people are EXTREMELY motivated to get a solution to their problems.

So what you need to do is find products with sales pages that target these people people.

So when someone in a desperate situation reads the sales page, it resonates with them on a deep level.

It's almost like the product vendor totally gets their situation and can relate to what they're going through right now.

And the end result... They're much more likely to take action and snap up what you're promoting.

So look for products that cater to desperate people in your market and you'll notice your conversions are considerably higher.

### 3. Complete Systems:

When looking for a products to promote, you want to look for complete "A to Z" systems.

As in, a course that will take you from the beginner stages, right up to the advanced levels of whatever they're trying to achieve.

**Let me give you an example...**

Say your market is the bodybuilding market - you don't want to promote anything that shows you how to get a six pack or how to get bulging biceps...

**What you want to do is promote a bodybuilding course that takes them from start to finish on how to build their ENTIRE body, instead.**

**There's a couple reasons why you want to opt for these kinds of products...**

First up, they apply to a much larger segment of your market.

So not only do they apply to the beginners, but to the intermediates and advanced users. It covers every single aspect of whatever they're trying to achieve.

Plus - and this is the best part - they pay bigger commissions because generally, they're much bigger courses that cover a lot more information... Hence the higher price tag.

## Part 2: Using The Correct Affiliate Network For Your Market

Okay, so you've found the profitable segment of your list... Awesome.

What we need to do now is to head over to the affiliate network that caters best to your market.

Now I touched on this in the last chapter but I'll bring it up again, just in case you need a quick recap...

If you're selling anything related to internet marketing, then these are the affiliate networks I recommend you checkout:

- [JVZoo.com](http://JVZoo.com)
- [Warriorplus.com](http://Warriorplus.com)

[Clickbank.com](http://Clickbank.com) is worth checking out too but the other two are far superior when it comes to internet marketing related products.

But yeah, these networks generally cater towards all things internet marketing like:

- Make money online courses
- affiliate/CPA/Traffic generation courses
- SEO software and courses

Now if you're going into a non "internet marketing" market, then the best one in my opinion is [Clickbank.com](http://Clickbank.com).

**So anything vaguely related to:**

- weight loss
- Bodybuilding
- Fishing
- Gardening
- Seduction
- Getting your ex back
- Anything "computer" related
- DIY how-to courses

- Gambling
- Anything "sport" related
- Dieting
- Cooking

Now that you know which affiliate network caters towards to your market, lets move onto the next step...

### **Part 3: Choosing The BEST Affiliate Offer To Promote**

All we gotta do now is find you a product to promote.

Now I'll level with ya... This is easier said than done.

Why? Because not all products are equal, of course.

**There's loads of factors to consider but what ultimately matters is how well the product converts.**

Obviously, the higher the product converts, the MORE money you're gonna make.

So this is what you need to be looking for:

#### **Choose a Product That Cost No More Than \$100:**

I would recommend to find a product that sells for around \$17 - \$100.

Any higher than that and it's going to involve more selling with smarter marketing.

So no higher than \$100 - especially if you're new to selling and stuff.

#### **Is The Sales Copy Good?:**

One of the first things you need to do is to checkout the sales copy on the sales page.

When you read the sales page or watch the sales video, does it convince you?

If so, that's a strong indicator the sales page will convert.

Like I said before, if you're in a market full of desperate people, then you want to look out for sales pages catering towards these kind of people as it'll help with conversions.

## Does The Sales page Have Lots of Proof Elements?:

You want a sales page with LOTS of proof elements on it.

**In fact, the MORE proof elements on the sales page, the MORE it's going to increase conversions.**

**So look for stuff like:**

- Testimonials - the more the better (video testimonials have more credibility)
- Income proof - video has more credibility than image income proof
- Screenshots of Facebook comments from happy customers
- Images of customers getting the desire outcome promised in the product

## Does The Product Have Lots of Good Reviews in Google?

The first thing people do when they're interested in a product is search Google for reviews for it.

So when you've found a product you think will convert, you need to "Google" reviews and see what the reviews are saying.

If there's a lot of good reviews on the first page of Google for "[product name] reviews" then that's going to MASSIVELY help with the conversions.

If, however, there's lots bad reviews on the first page of Google... Then that's going to negatively affect the conversions, as well.

So be sure to check the first page of Google as this will effect the conversions massively.

## Does The Product Vendor Have a Good Reputation?:

Just like the product - people will likely do research on the product vendor as well.

So once again, do a "Google" search and to see what other sites are saying about the product vendor.

If it's generally good - once again - it'll help with the conversions.

And of course, if it's bad, then it WILL have a negative impact on your conversions.

### **Look For Products That Have Upsells:**

A good way to make more money per customer is to promote a product with "upsells" on the backend.

This is when someone buys the product you're promoting and then they are instantly offered another product.

**You can literally turn a \$20 commission into a \$200 commission - sometimes more.**

### **Promote Products That Pay Recurring Commissions**

Another way to get more bang for your buck per customer is to promote products that pay recurring commissions.

#### **Here's how it works...**

Instead of paying once for a product, they have to pay a monthly fee to stay a member.

This works really well when you're promoting software or a service as they can potentially stay a member for years.

And what started as a \$10 commission, can literally turn into hundreds of dollars of commissions over a lifetime of the customer staying a member.

It can be a great way of scaling your income up when promoting recurring paying products.

So they are definitely worth promoting if you think it'll convert well.

### **Here's What I Want You To Do Next...**

So you're filled to the brim with knowledge on how to find profitable products to promote...

What I want you to do now is spend some time finding a product to promote.

**If you'd like to get started with the EASIEST product for a beginner,  [CLICK HERE..](#)**

Otherwise, go ahead and start diggin' around. I'm pretty sure you'll find something to promote fairly quickly. There's definitely plenty to choose from.

Once you've done that, you'll be ready for the next chapter!

# STEP 4 - Build Your FIRST Website In JUST 10 Minutes With ZERO Experience Using FREE methods

(Time To Complete Today's Training: Approx 30 minutes)

Now that you've found a profitable product to promote, what we need to do is build a website with some content so you can start bringing in the dough.

**Promoting affiliate links directly without some form of valuable content like a blog post, review, etc. will NOT make you much if ANY money online. Providing value is a PRINCIPLE of wealth!**

So in today's training, I'm gonna show you how to build your first "value-content" website from scratch in literally minutes from now using FREE methods.

## Part 1: Setting Up Your Site

The first thing we're gonna do is use a free website builder.

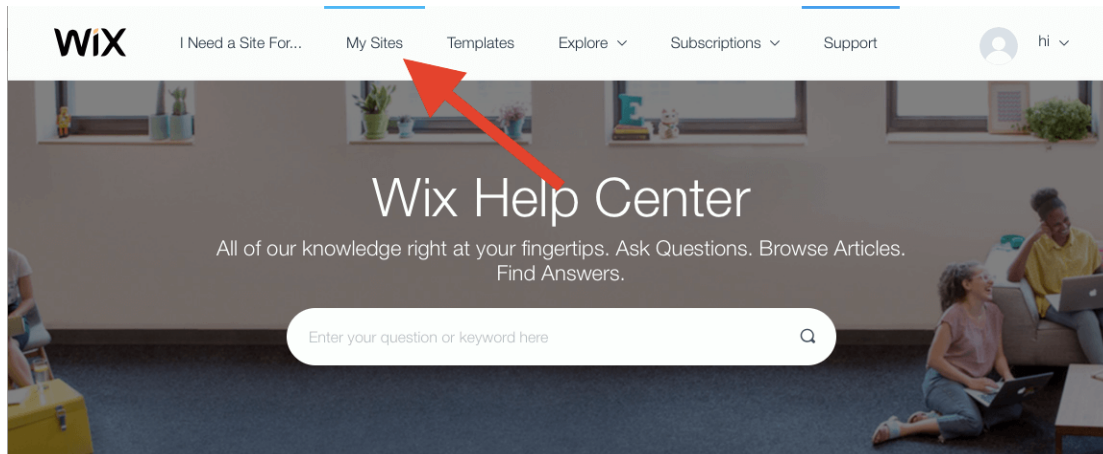

Now there's like, a gazillion of these sites out there that allow you to build sites for free.

Most, if not all, are really good, actually.

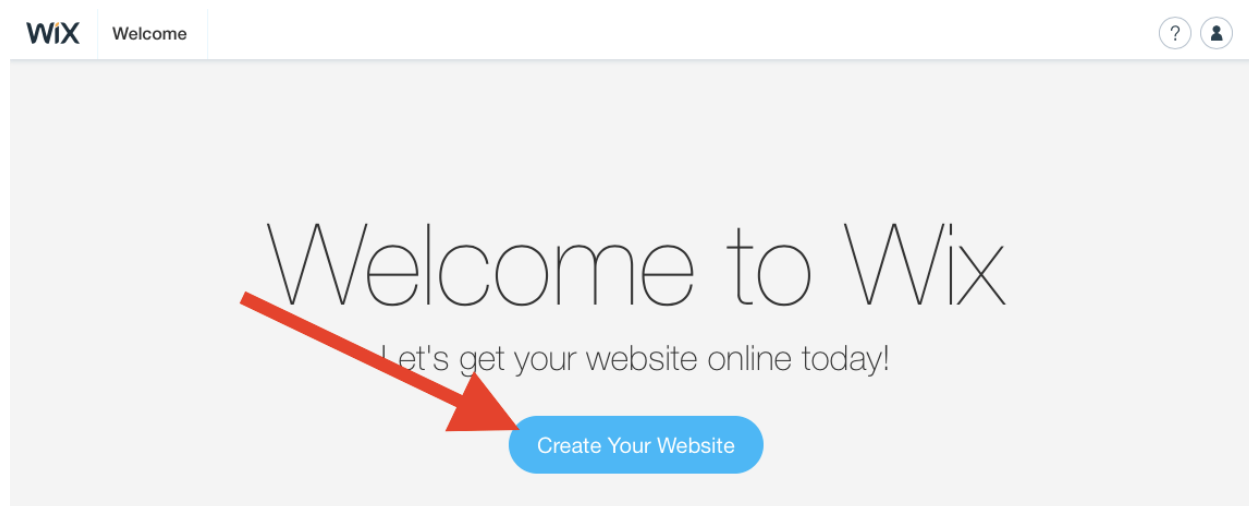

But for today's training, I'm show you how to setup your website using Wix.

**Lets begin:**

1. The first thing you need to do is head over to [Wix.com](https://www.wix.com) and create an account.
2. Once you've done that, click on "My Sites"

3. Then click on "Create Website" to get started:

4. What we need to do now is to pick a website template.

There's tons to choose from so feel free to browse around to your heart's content.

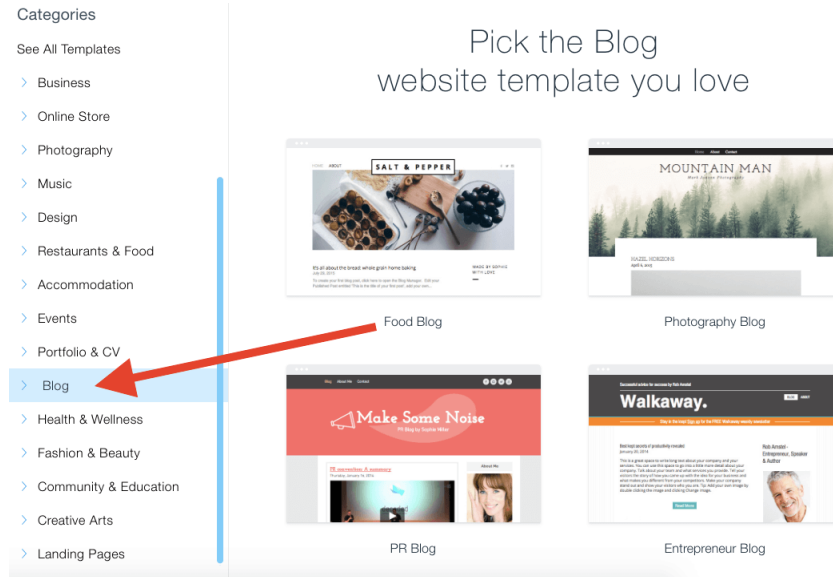

You'll also notice there's templates dedicated to different markets.

So it might be worth having a look at them and to see if any intrigue you.

If you're still not sure, then simply choose one from the "Blog" category.

Once you've found the one you want, hit "Edit" then move to the next step:

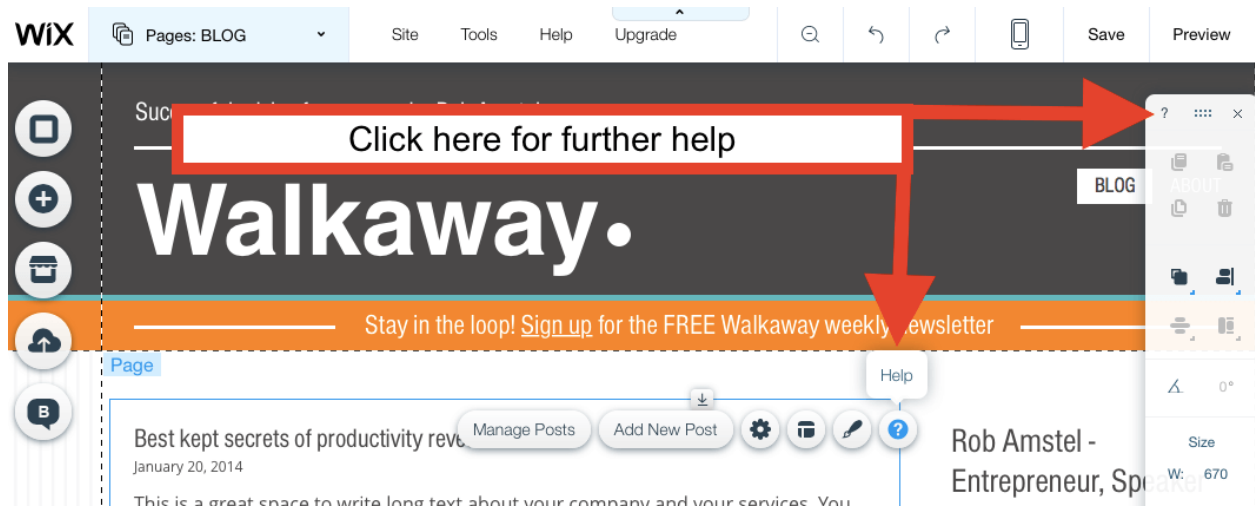

5. After that, you're gonna be taken to the website editor.

Now this may look a little overwhelming - but once you get used to it - it's actually quite fun and easy to use.

A lot of it is "drag and drop" and they offer LOTS of help and tutorials when you press the "?" icon:

You don't have to spend too long editing your site (unless you want to).

**But make sure to do the following:**

- Change the title and subtitles to whatever you want
- Delete the example posts

- Delete all the panels/widgets in the sidebar you are not using
- Remove photos of people and/or put pictures of you instead

So like I said, spend as little or as long as you want on editing your site.

But whatever you do, don't hit "Publish" just yet...

This is because we need to complete the next part before your site goes live.

## **Part 2: Creating Content For Your Site**

Now we need to create some awesome content for your site.

Then, we can monetise it with the affiliate offer we found in chapter 2.

We're getting close to making your first sale online! Excited?

## **So What Should You Write About, huh?**

It doesn't matter what market you're in, there's always a near limitless supply of articles you can write about.

But if you're stuck for ideas, I'll share 3 popular articles types you can model:

### **1. How To Guides:**

Write a tutorial where people in your market are needing a solution to a problem.

You can link to your affiliate offer throughout the article and plug it at the end as the ultimate solution to their problem, as well.

### **2. Top 10s:**

Everyone loves top 10s - regardless of what market you're in.

The best thing about 'em is that people always read them until the end, as well.

This is because once us pesky humans are invested, it'll bug us until we know what #1 is.

**Now there's LOADS you can do but here's some to get you rollin':**

- 10 ways to burn belly fat fast
- 10 quick and easy ways to make money online
- 10 tips to getting ripped abs
- 10 reasons you need to upgrade to the latest Windows for your PC
- 10 methods to generating traffic using free methods.
- 10 tricks to falling asleep quickly without aids or pills

There's a ton of options. And people love 'em too.

That, and you can plug your affiliate offer during and at the end of the article as well.

### **3. Write a Review:**

A new product in your market coming out and it's getting a lot of buzz?

If so, then why don't you write a review for the product?

You can either buy it or contact the product vendor and ask for a review copy.

**You might think you won't get one but you would be surprised by how many of these product vendors are more than happy to give you a review copy for free.**

Besides, there's no harm in asking, right... So ask regardless.

Also, if the product has an affiliate program, you can monetise your review with an affiliate link to the product.

There's other things you can do as well, like rank it in Google for the product keyword as the traffic is EXTREMELY targeted.

Another thing you can do is offer a free bonus to people who buy through your link too.

That will increase conversions as it forces people to buy through your link and not other people's affiliate links.

**Don't have bonuses to offer? You can use mine  [CLICK HERE](#)**

**So there you have it...**

3 methods on writing articles your market will absolutely love :-)

What I want you to do now is to simply start writing an article - and once you've done that - it "Publish" and your site is officially live..!

**Don't want to write articles? Check out my secret content machine that'll fill your blog with QUALITY high-converting articles INSTANTLY!**

 [CLICK HERE](#)

**Here is another platform that you can build your site on, especially if you want to focus on reviews:**

 [CLICK HERE](#)

## **STEP 5 - Get a MASSIVE Flood of Traffic In Minutes & Generate Sales TODAY"**

**(Time To Complete Today's Training: Approx 35 minutes)**

I'm gonna start off by saying, there's literally hundreds of traffic methods out there. I would know, I've spent THOUSANDS testing them. But you don't have to.

In fact, if you want my very BEST traffic-getting methods, you can learn about them for free:

 **GET IT HERE**

Anyway, I thought I'd share this particular method because it's great for anyone starting out.

Why? Because it's quick, easy, free to do. AND it work\$\$.

**Now before I walk you "step by step" through the ENTIRE process:**

I just wanna give you a QUICK heads up on my special offer. I'm giving away TRAINING, WEBSITES, TRAFFIC, LEAD PAGES, & SALES COPY for free!

It will end very soon, so if you want to know how to get \$1,497+ of my BEST money-making tools and training absolutely FREE... Then click the button **below**:

But Wait – Before You Continue...

And MORE....

So what's the method?

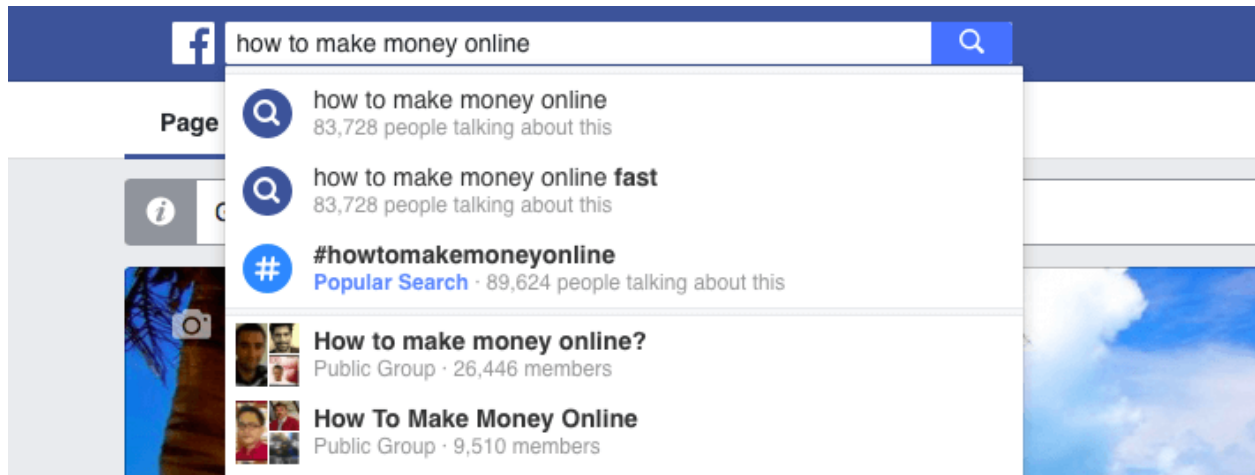

### Part 1: The Facebook Method

1. So the first thing you're gonna need is a Facebook account.

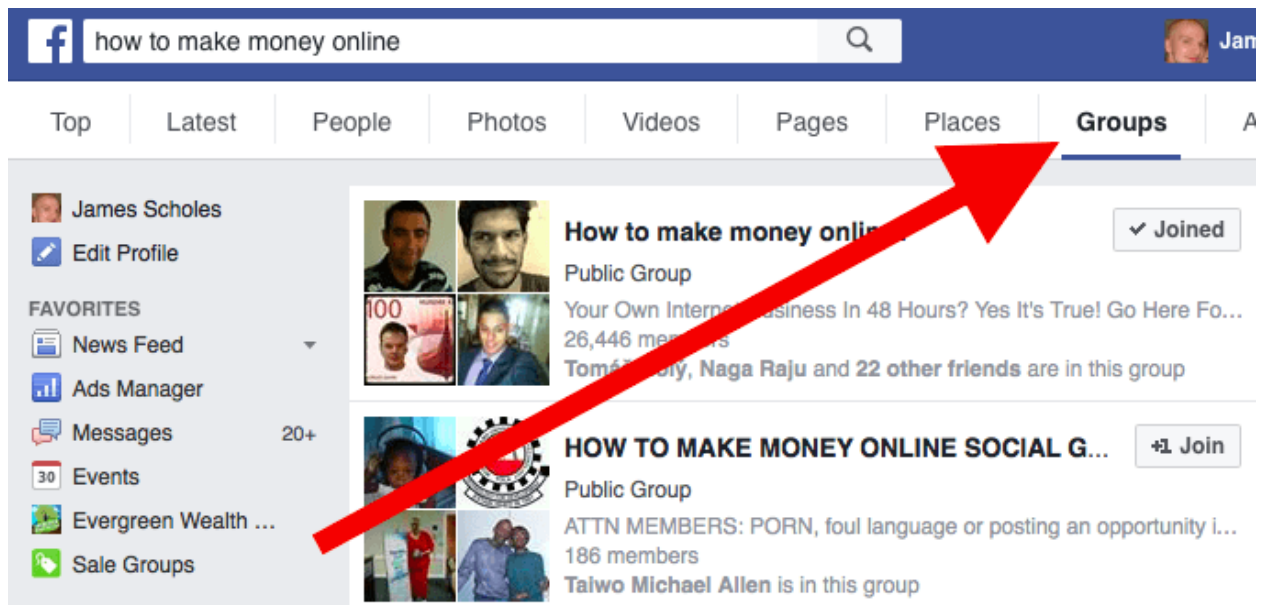

Now practically everyone has one but if you haven't got one, then you can [sign up here](#).

2. Now head to the search bar at the top and type in the keyword that best represents your market but in the broadest term possible.

Then hit the search/magnifying glass button.

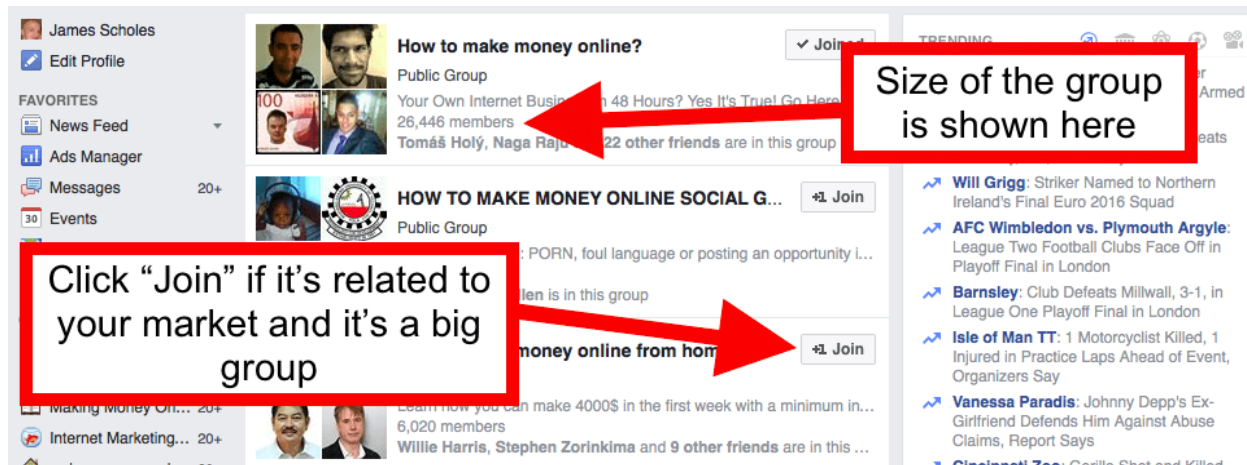

3. Once it brings up the search results, you now want to click on the "Groups" tab:

4. Now this will bring up all the groups related to your market.

What you want to do now is join around 15 - 20 of the largest groups you can find.

### Warning - Please Read

You can join more groups if you want to...

But if you join too many groups too soon, Facebook can potentially lock you out of your account for anywhere up to 7 days.

However, that said, Facebook will normally give you a friendly warning to slow down before locking you out for 7 days.

5. Getting approved at these groups can take anywhere from minutes to a few days - depending on the group admin and when they approve you, really.

But once you've been approved, you want to head to the group and post your article you wrote and then hit "Post":

### IMPORTANT

When posting, I recommend putting a little blurb with the link you're posting

This will help to "humanize" the post and make it less spammy looking, as well.

So just before you post the link, put something like...

"Hey guys, just thought I'd share this with you. It shows you how to "blah blah blah"

6. Once you've done that, you basically rinse and repeat the method and post your link to the rest of the groups you joined.

7. Then on the second day, find and join another 15 - 20 groups in your market with a large following and post to them as well.

From there it's just a case of repeating the method, while slowly scaling it up in the process.

### **Bonus: How To Automate The ENTIRE Method & Scale It Up To Get Massive, Passive Traffic FAST**

Now this traffic method will start to bring in small trickles of traffic as soon as today.

But if you really wanna ramp it up, then you're going to need to start posting to hundreds of groups on a daily basis.

Now as you can imagine, this is A LOT of work, but thankfully, there's a way you can do this on complete auto-pilot...

So if you really want to automate and scale this up as well, I recommend grabbing a software called [Su Social](#).

I personally use this software to post to hundreds of groups every single day.

**It brings me hundreds of leads to my site every day WITHOUT fail and it runs on complete auto-pilot!**

You get a FREE 5 day trial - after that - it's \$10 a month.

Even if you make just one commission a month from using SuSocial (which you won't - you'll make way more than that) then [Su Social](#) has not only paid for itself... But you've made a profit, as well.

So if you want to take this particular method to the next level and scale it up and automate it at the same time, there's no better option than [Su Social](#), in my opinion.

**But that's not all, I've ALSO got this for you too...**

## **How Would You Like To Get Instant Access To My Secret "\$1K a Day" Formula?**

**Quick question...**

Do you want to learn how to make a full time, passive income in the quickest and easiest way possible?

If so, then I have something very special for you...

For a limited time, I'm going to share something I like to call, the "\$1K a day" formula.

Seriously, this is really powerful stuff and I think it'll blow your mind when you see it.

**In fact, when you click the button below, you'll see how I made over \$7,564.56 in the last 29 days using this simple formula.**

**But here's the best part...**

Anyone can get results with this - even complete beginners.

Everything is laid out in an easy to follow "step by step" manner anyone - regardless of experience - can implement.

So if you want in on this, then click the button below.

See you on the other side!

# STEP 6 - Generate EASY Commissions From Youtube Without Making a Single Video

(Time To Complete Today's Training: Approx 5 minutes)

## Part 1: Easy Way To Find Profitable Markets In Seconds

Okay, the first thing we need to do is to find a profitable market.

Now there's plenty of ways of doing this - one I even shared with you in previous training, if you remember.

However, there's one method I like to use that takes no time, whatsoever.

And that is, to simply enter an "evergreen" market.

**So what's an evergreen market?**

Evergreen markets are some of the most profitable markets out there.

Also, they're ALWAYS profitable - hence the term "evergreen".

**So they're not seasonal or fad markets - as long as the human race walks this earth - these markets will always exist and be profitable, as a result**

**So which markets are considered evergreen?**

Well, the quickest way to sum up an evergreen market is by using this phrase...

### **Health, Wealth and Relationships**

Basically, any market that falls under any of these 3 categories are considered evergreen.

**So for example: in the Health market, there would be:**

- Weight loss
- Bodybuilding
- Diabetes treatment/courses
- Erectile dysfunction
- Yeast infection cures
- Diet programs
- Cellulite removal
- Dental repair
- Hair loss

**Now for the Wealth market, you have:**

- Make money online
- Credit repair
- Forex
- Traffic generation
- Binary options
- Buying stocks and shares

**And finally, we have the relationship markets, which are:**

- Get your ex back
- Seduction
- Pick up artistry
- Dating guides
- Marriage counseling

Obviously, there's a lot more evergreen markets out there, and even more sub-markets in the evergreen markets I listed above. But hopefully, you get the idea.

Now here's the really cool thing about evergreen markets...

**Not only are they hyper-profitable, but they're filled to the brim with desperate people too**

So why is that good for us?

**Well, here's the thing...**

The biggest action takers in any segment of the markets are the "desperates".

Let me give you an example: if you were drowning, would you put it off till tomorrow?

Or maybe sort it out after tea?

Or maybe save yourself from drowning after your favorite TV show?

No, it gets sorted out... RIGHT NOW!

No ifs, no buts, you do something about it right now - everything else instantly becomes secondary.

Now obviously, this is an extreme example, but it points out how people in a desperate situation think.

**And the more desperate people are, the more likely they are to take action**

So this is what I want you to do right now...

I want you to pick an evergreen market that resonates with you the most.

Any will do as they're all profitable markets.

You can choose one of the both if it makes your life easier if you want.

Once you've done that, I'll see you in the next part!

# STEP 7 - Pump Out PROFITABLE Videos In SECONDS Without Video Creation or Editing Skills

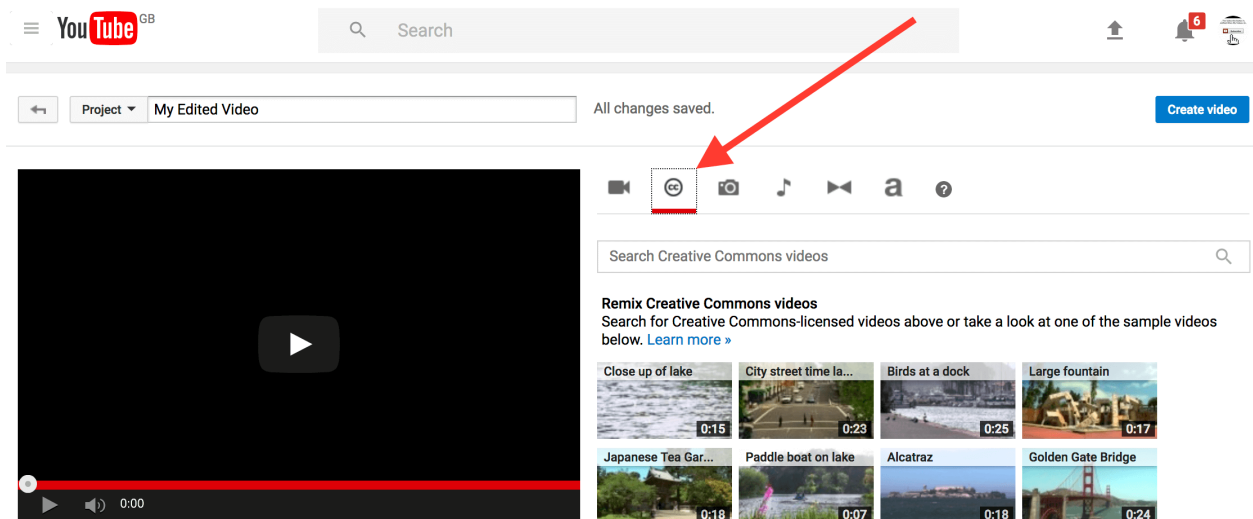

(Time To Complete Today's Training: Approx 40 minutes)

## Part 1. Video Creation... The Easy Way

Assuming you've already created a Youtube account (if not, you need to do that, obviously), you need to head to the Youtube Video Editor Section.

If you don't know where the Video Editor section is, you can find it [here](#).

Once there, I want you to click on the "CC" section:

So what's "CC", I hear you ask?

**Well, "CC" stands for "Creative Commons" and these are basically videos other Youtubers have created that you are free to use as your own videos.**

There's literally thousands to choose from and every market is catered for, as well.

Now the type of videos we're going to make are "List" type videos.

**There's a couple of reasons for this:**

1. They deliver genuine value as you're giving helpful tips in your videos.
2. They rank better in Youtube search results as they naturally have a higher retention rate due to people sticking around till the end to find out what #1 is.

Now, people tend to make top 10s but I recommend lowering the number to 3 or 5.

It'll make your life easier, plus people don't really care about the first few because they know the best ones at the end anyway.

**Now when searching for videos in your market, I want you to use phrases like:**

- 10 weight loss tips
- 10 bodybuilding tips
- 10 ways to make money online tips
- 10 ways to get my ex back tips

When you use phrases like this, you're going to bring up tons of "Top 10" style videos in your market.

What I want you to do next is to simply drag 3 to 5 "List" type videos into the Timeline Editor like this:

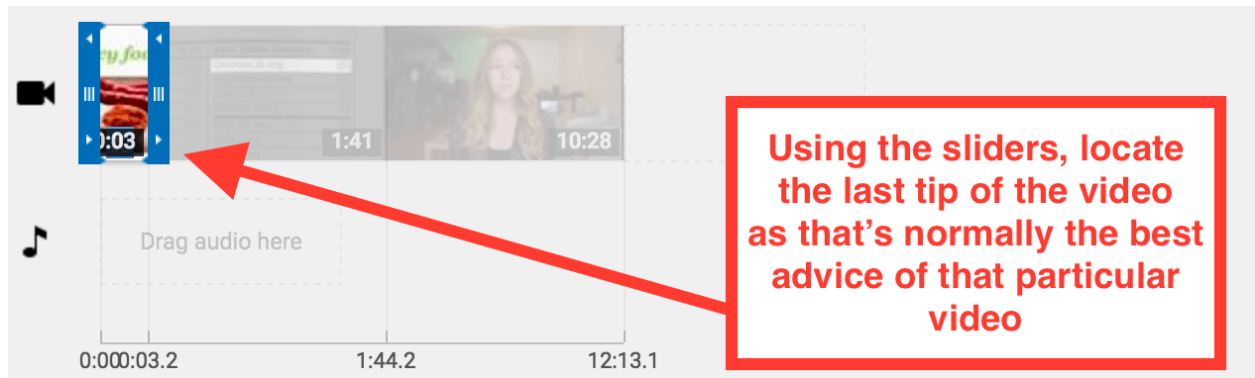

**(Obviously, I recommend watching the videos before selecting them to make sure they're quality videos)**

The image shows a YouTube search interface for "10 weight loss tips". The search results display a grid of video thumbnails, including one titled "10 Foods to Eat to Burn More Calories" which features before-and-after photos of a man and a woman. Below the search results is a video editor timeline. The timeline shows three video segments: one from 0:00 to 0:49, another from 0:49 to 1:41, and a third from 1:41 to 10:28. A red box with a white border and a red arrow points to the 10:28 segment, containing the text "Drag and drop your videos here".

Once you've done that, click on the first video in your timeline.

Then using the blue slider bars on your video in the timeline, I want you to locate their final tip which is normally at the end of the video:

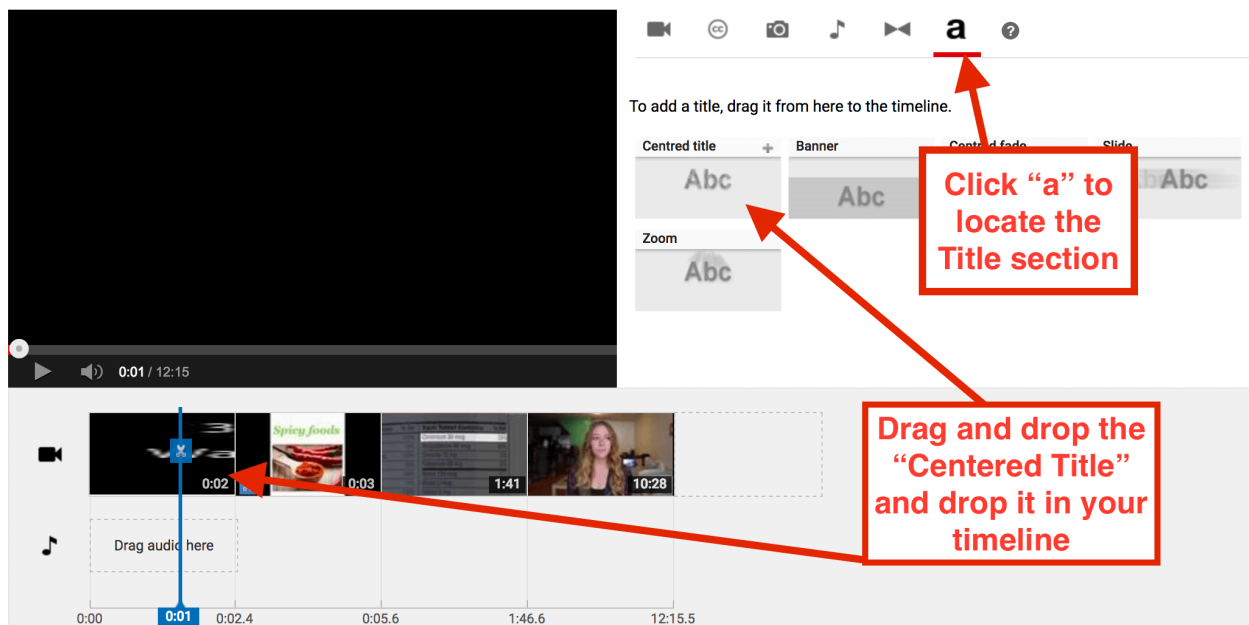

The reason why we opt for their final tip is because it's normally the best tip of that particular video.

Now you need to rinse and repeat this for the rest of your videos in your timeline.

## Part 2. Creating Titles For Your Video

Once you've done that, we now need to create a title for your video.

Simply click on the "a" symbol and drag and drop the "Centered Title" onto your timeline.

You can call your video whatever you want but for my example, I'll call my video "3 Quick and Easy Ways To Lose Weight Fast" and set it to run for 5 seconds:

**(Once again, I recommend spending a little time by playing around with the font size and colors etc to make it look good)**

The image shows a video editor interface. On the left, a video player displays the text "3 Quick and Easy Ways To Lose Weight Fast" on a black background. The video player has a progress bar at the bottom showing 0:01 / 0:05. On the right, there is a text editing panel with options for Font (Open Sans), Bold (B), Italic (I), Size (Medium), and Colour. The text field contains "3 Quick and Easy". Below the text field is a background colour selector set to black. A red box with an arrow points to the text field, containing the text "Put your title here". Below the text editing panel is a timeline with a blue bar at the 0:05 mark. A red box with an arrow points to the blue bar, containing the text "Drag the blue bar to around 5 seconds".

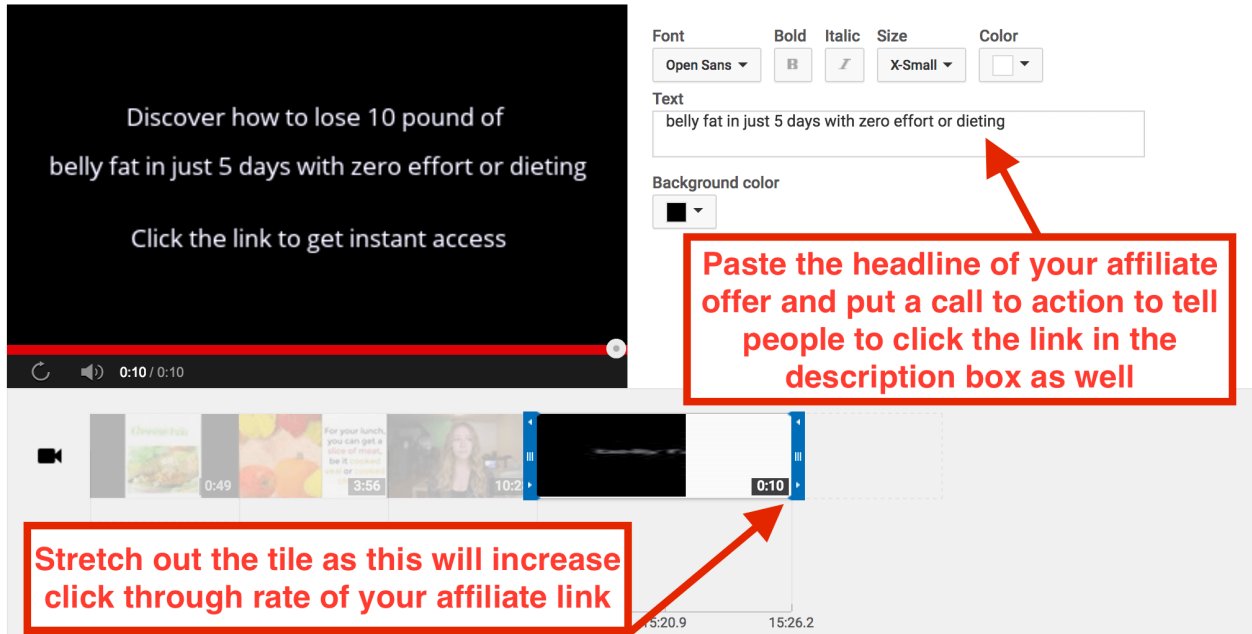

Once you've done that, we now need to put a "Centered Title" at the very end of your video in the timeline.

This will have a call to action telling people to click the link in the description box.

**What you want to use here is the headline on the sales page of the affiliate offer we found in yesterday's training.**

Then on the same tile, you want to put something like "Click the link in the description box to get instant access".

Also, lengthen the tile so it runs 10 - 15 seconds as it encourages more people to click the link in the description box, as well:

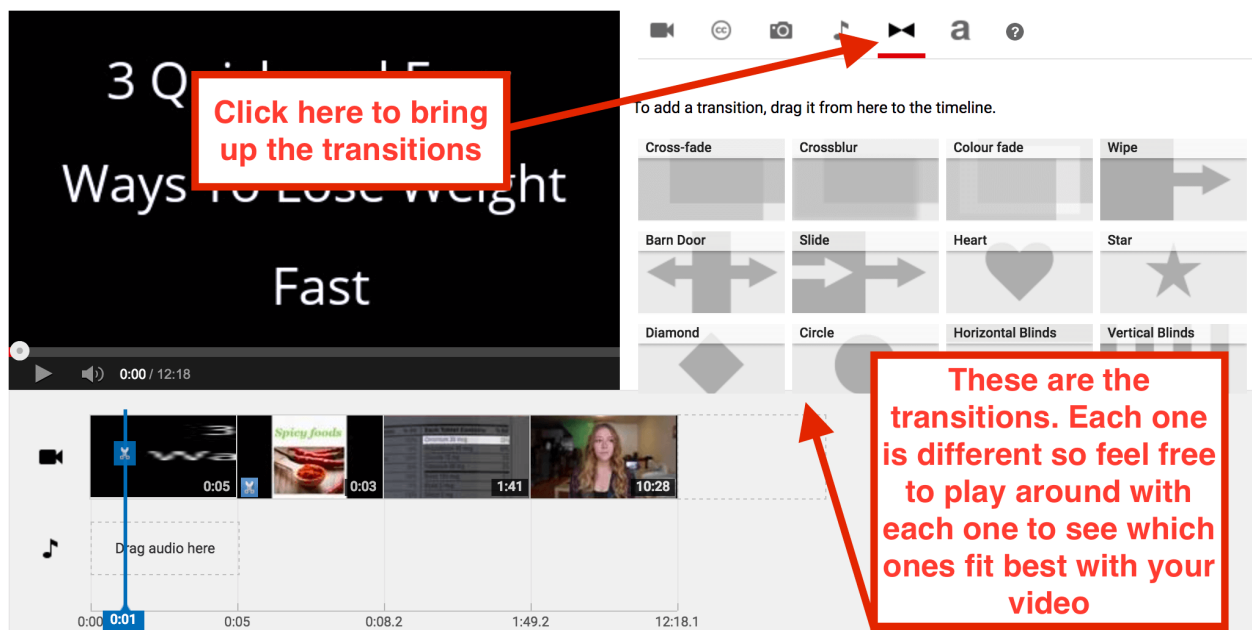

### Part 3. Quick Tweak To Improve Your Video

Now the next step is an optional step but I recommend you do it.

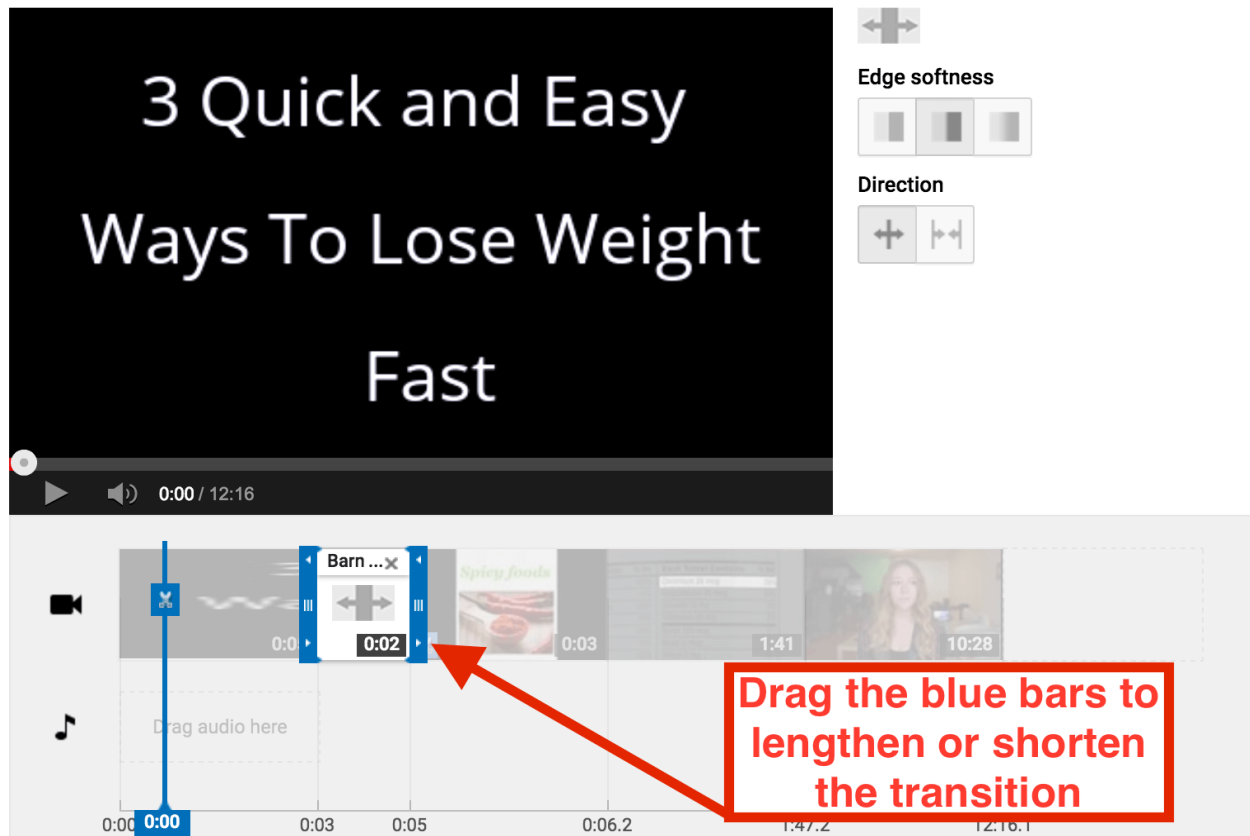

It's very easy to implement and it'll make your video look better too.

Basically, adding transitions between your videos to make them look a little fancier..

All you do is click on the following symbol and choose a transition:

Then drag and drop your chosen transitions between each of the videos on your timeline and make make each transition last around 2 - 3 seconds each:

And there you have it... You've just created your first ever video!

So give yourself a pat on your back 'cause you deserve it!

**But whatever you do - do not hit the "Create Video" button just yet...**

This is because we're not ready to publish it just yet.

So close the tab as we'll be coming back to it later (don't worry - Youtube saves it automatically every time you make changes to it)

Because the next thing we need to do is good ol' keyword research.

**This is absolutely essential otherwise, if you don't do this - your video will sink quicker than the Titanic and you'll get ZERO traffic as a result.**

...And we can't be having that, can we!

In the next chapter I'm going to show you how to QUICKLY get keywords you can rank for in just a matter of days and start making sales as a result!

## STEP 8 - DOMINATE The Search Results & Get FAST Rankings In 2 Steps - 100% FREE

(Time To Complete Today's Training: Approx 20 minutes)

By now you've created your very own video using yesterday's training.

So what we need to do is to teach you the skills on how to rank it in the search engine.

Now there's many ways you can go about this...

**But in today's FREE training, I'm gonna teach you the EASY way of finding a whole heap of keywords with ZERO competition that will send you TONS of traffic every single day without fail.**

Cool, huh, but it gets better too...

This is quick, easy - and more importantly - 100% FREE to implement, as well.

So if this sounds right up your street... Then you're gonna LOVE today's training :-)

**Now before I walk you "step by step" through the ENTIRE process:**

I just wanna give you a QUICK heads up on my special offer. I'm giving away TRAINING, WEBSITES, TRAFFIC, LEAD PAGES, & SALES COPY for free!

It's gonna end very soon, so if you want to know how to get \$1,497 of my BEST tools and training absolutely FREE... Then click the button **below**:

But Wait – Before You Continue...

## Discover How To Get Over \$1,497 Of My BEST Tools & Training Absolutely FREE

But Hurry – This FREE Offer Is Only Available For a Limited Time

- ➔ Free Monthly Traffic - Value: \$99 - Yours FREE
- ➔ Free Link Tracker, Page Builder, Affiliate Program, Autoresponder - Value: \$1,000 - Yours FREE
- ➔ 4 High Converting Squeeze Pages - Value: \$99 - Yours FREE

- ➔ The Overnight Cash Hack System - Value: \$97 - Yours FREE
- ➔ Emergency Fast Cash Blueprint - Value: \$97 - Yours FREE
- ➔ Safelist Marketing Tactics Ebook & Resell Rights - Value: \$97 - Yours FREE

And MORE....

Anyway, let's jump into the training...

### Part 1: Getting Your Root Keyword

So the first thing we need to do is head over to Google keyword Planner.

You'll need a Google account to access Google Keyword planner, by the way.

If you haven't got one, go create one, then click [here](#) to go to Google Keyword Planner.

Then click on the first drop down menu and enter your broadest keyword.

So for example, if you're in the weight loss market, you would use "weight loss".

## Keyword Planner

Where would you like to start?

1. Click here to open up the options

 Find new keywords and get search volume data

▼ Search for new keywords using a phrase, website or category

Enter one or more of the following:

Your product or service

Your landing page

Your product or service

Targeting 

All locations 

All languages 

Google 

**Negative keywords** 

Date range 

Show avg. monthly searches for: last 12 months 

Customize your search 

**Keyword filters** 

**Keyword options** 

Show broadly related ideas

Hide keywords in my account

Hide keywords in my plan

**Keywords to include** 

**Get ideas**

2. Put broadest term to describe your market here

3. Hit "Get ideas" to generate keywords

You should be forwarded to the next page where you can find your keyword data.

From there, you need to click on the "Keyword Ideas" tab and click on "Avg. monthly searches".

The screenshot shows the Google Ads Keyword Planner interface. At the top, there is a search bar with "weight loss" entered and buttons for "Get ideas" and "Modify search". Below this is a yellow banner with the text: "This page shows ranges for search volumes. For a more detailed view, set up and run a campaign. [Dismiss](#)".

Underneath, it says "Average monthly searches for all ideas. **10M – 100M**".

There are two tabs: "Ad group ideas" and "Keyword ideas". A red box with the text "Select 'Keyword Ideas' tab" has an arrow pointing to the "Keyword ideas" tab.

Below the tabs is a table with columns: "Avg. monthly searches", "Competition", "Suggested bid", "Ad impr.", and "Add to plan". A red box with the text "Click on 'Avg. Monthly searches' to bring the keywords with the most searches to the top" has an arrow pointing to the "Avg. monthly searches" column header.

At the bottom, a table shows a single keyword: "atkins diet" with "100K – 1M" searches, "Low" competition, and a "Suggested bid" of "£0.66".

Now you should be presented a huge list of keywords to work with... Awesome.

So there's 3 things we're looking for when picking a keyword to work with...

**These being:**

1. We want a keyword that's getting a lot of monthly searches - the more the better, in fact.
2. The more words in the keyword phrase, the better as they're easier to rank.
3. It has to match the topic of your video (although, you can quickly edit the video to match the topic keyword if you want - your call, really)

So going through my list, I see there's loads of keywords I can use.

But the one I'll opt for is "how to lose weight fast for women".

diets that work	10K – 100K	Low	£1.61	»
hoodia	10K – 100K	Medium	£0.24	»
balanced diet	10K – 100K	Low	£0.82	»
best exercise to lose weight	10K – 100K	Low	£1.02	»
how to lose weight fast for women	10K – 100K	Low	£2.71	»
liquid diet	10K – 100K	Low	£1.13	»
raw food diet	10K – 100K	Low	£0.90	»
diet to lose weight fast	10K – 100K	Low	£1.01	»

But why this keyword, I hear you ask?

Well, like I said above...

It gets lots of searches (10K - 100K a month) and it's a "7 worded" keyword phrase.

Not bad - considering it took me like, 60 seconds to find too.

Anyway...

What I want you to do now is to copy and paste that keyword into a notepad document.

## Part 2: Using Youtube To Get Long-Tail Keywords

Once you've done that, we now need to head to [Youtube's homepage](#).

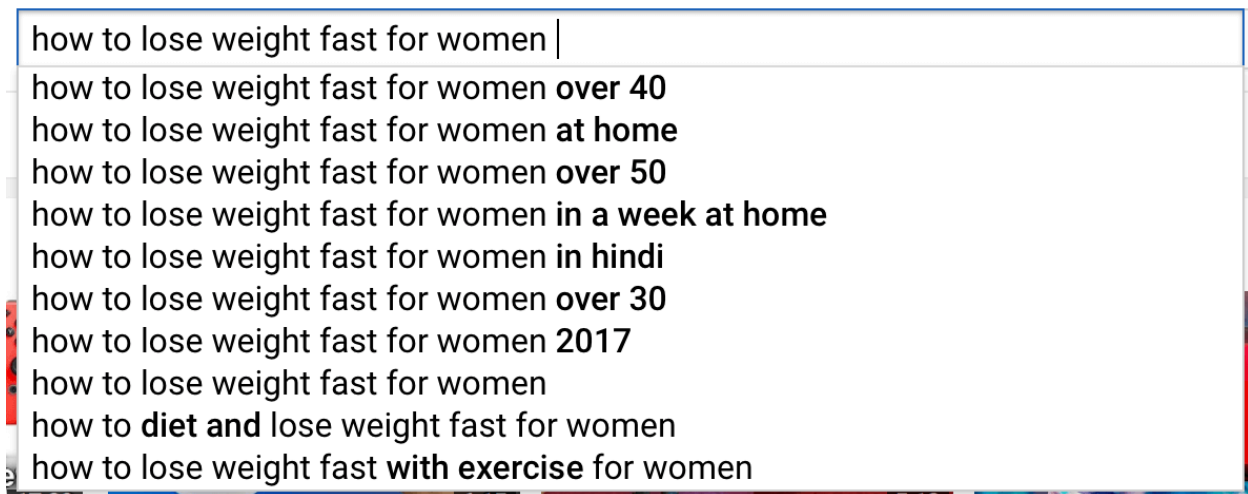

By the way, make sure to log out before doing the following steps...

This is because a logged in account will show you personalized results... Which we don't want.

Okay, what we need to do now is to put your keyword in Youtube's search bar.

And instead of hitting "enter" to bring up the search results, press "space bar" instead.

Once you've done that, you should see something like this:

So what are we seeing here, huh?

Well, this is what you call Youtube's Search Suggester (Google search has one too).

And when you enter your keyword, Youtube's gonna suggest other keyword phrases.

**Now here's the thing...**

Youtube puts the most searched-for keywords after your keyword at the top.

And as you go down the suggester list, the less searches the keywords get.

So what you want to do is use these keywords for your title, description and tags

So in my example, here's what I would do in this instance.

**For my title, I would have something like:**

"How to lose weight fast for women in a week at home - works for over 30, 40 and 50 year olds"

Notice how I've got the top few keywords in there along with my main keyword?

When you do this in your Youtube title, you'll rank for dozens of other keywords as well.

**And for your tags, I would use:**

- How to lose weight fast for women
- How to lose weight fast for women in a week at home

- How to lose weight fast for women at home
- How to lose weight fast for women over 30
- How to lose weight fast for women over 40
- How to lose weight fast for women over 50

Once again - notice I'm using the auto-suggest tool find tags for my videos.

This is because you'll start to show up for these keywords and dozens of variations of these keywords, as well.

**Okay then, this is what I want you to do next:**

1. I want you to complete today's training by finding a keyword with Google Keyword Planner using the criteria in part 1.
2. Then using Youtube auto-suggest, I want you to use it to write a "keyword rich" title and use it to get the tags for your video too.

Once you've done that, you'll be ready to start the next chapter.

# STEP 9 - **Generate More Traffic and Sales... TODAY**

(Time To Complete Today's Training: Approx 35 minutes)

This is it. The final curtain call.

Today is the day where we post your video and start getting traffic to it.

And you know what happens when you start getting traffic, right?

Good ol' sales and commissions start flowing.

**So yeah, you're finally going to start seeing your hard work pay off :-)**

I hope you're excited 'cause I am - especially with all the cool stuff I'll be sharing with you in today's training.

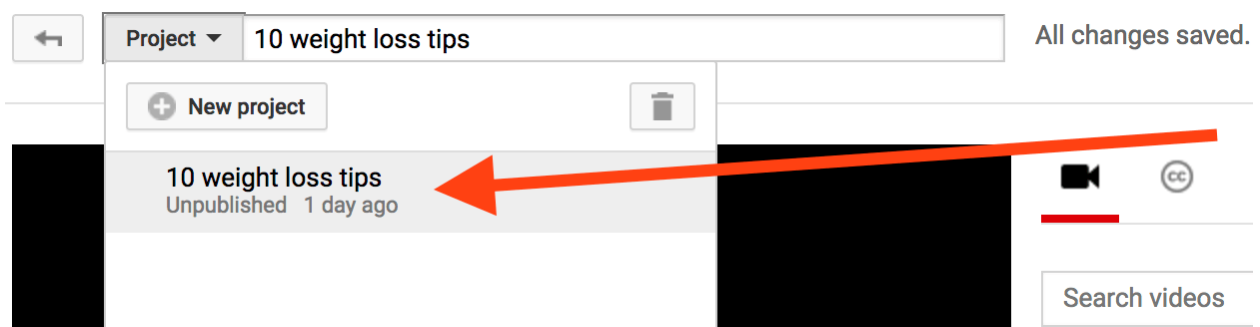

## Part 1: Optimizing Your Video

So the first thing we need to do is to head back to Youtube Video Editor.

(You can jump straight to the [Youtube Video Editor here](#) if you can't find it)

From there, you need to select the project you were working on before.

As you can see, I've called my project "10 weight loss tips":

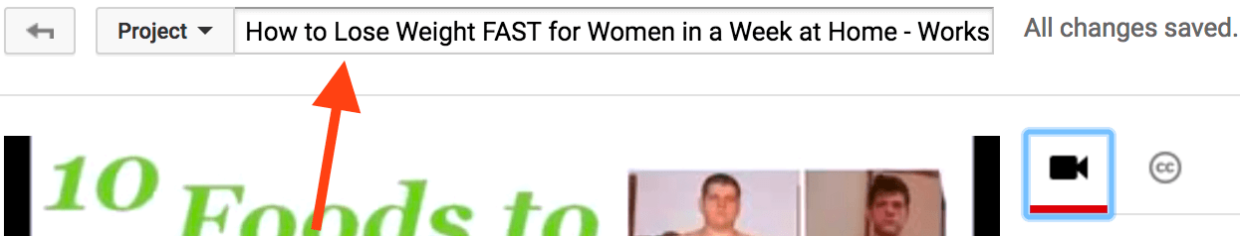

What you want to do now is put the title we worked on yesterday as your new project name.

**So for example, mine was:**

"How to Lose Weight FAST for Women in a Week at Home - Works for Over 30, 40 and 50 Year Olds"

So I would just paste my title into the project like this:

Once you've done that, just hit the "Create Video" button and it should start processing your video.

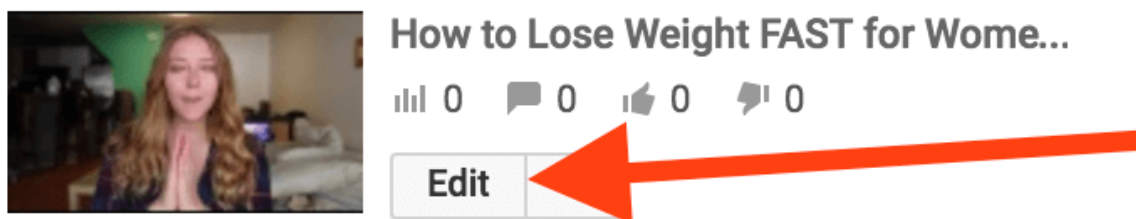

Great, your video is now ready for all to see, but we're not done yet, sunshine...

What you need to do now is to head over to your [Youtube's Dashboard](#).

From there, you'll see your video at the top of the "Video" section.

Simply click on the "Edit" button as we need to edit the video further:

## VIDEOS

**Now there's 3 things you need to do, these being:**

1. You need to put your affiliate link you got from "Day 1 Training" in the description box.

You can put in "as is" but affiliate links on average look long, ugly and people don't like clicking raw affiliate links because they look like they could give their computer a virus.

So my recommendation is to use a link shortener service to mask and shorten your affiliate link.

There's loads out there but the one I use is Google's Link Shortener service.

It's quick, easy and free to use too, so if you want to use it, you can find it [here](#).

2. The second thing you need to do is copy and paste the headline from your affiliate offer you're promoting next to your affiliate link.

Then put the video title in the description box too as this contains all the keywords you want to rank for.

3. Finally, put your tags we researched in yesterday's training in the "Tags" box.

If you're not sure what I mean, have a look at this image and you'll see how to do it:

How to Lose Weight FAST for Women in a Week at Home - Works for C

[AFFILIATE LINK HERE] - [HEADLINE FROM AFFILIATE SALES PAGE]  
[VIDEO TITLE]

[TAGS HERE]

Right then, once you've done that, we now move onto the next stage...

## **Part 2: Boosting Your Video In The Search Results**

Now the best way to boost your video is to make sure it gets a high retention rate.

That's people watching the vast majority of your video, just in case you're wondering.

**So the more they watch your video, the higher the retention rate and the further up it goes in the search results.**

However, on the other end of the scale...

If your video has a low retention rate, then it's going to sink in the search results.

### **So how do we improve retention?**

Well first up, you've got to make a quality video that people want to watch, obviously.

So make sure your video is engaging and it delivers what the title of your video claims.

Now that's all very well and good, but it's still not enough.

You see, there's literally hundreds of hours of content uploaded literally every minute.

And guess what, they all want a cut of the pie too.

So how can we get a jump on our competition?

Well, the quickest and easiest way is to buy some high retention views.

Thankfully, this is really easy to do and it's dirt cheap too.

**You can literally get thousands of high retention views for like, 5 bucks.**

I know, right... Cheap as chips!

So where do you buy these high retention views, I hear you ask?

Well, there's plenty of places you can go but the best place is [Fiverr.com](https://www.fiverr.com).

So head over to Fiverr and do a search for "high retention views":

high retention views

Find Services

Now you will see tons of people who are selling high retention views.

So you'll have to spend a little time finding the best seller for your needs.

Obviously you want as many views as you can - at least a thousand, I'd say.

Another thing I recommend you do is to read the reviews...

**Unfortunately, there's a lot of bad eggs that either don't deliver or send you bot views that will get your video banned.**

So yeah, it's really important to read the reviews before ordering any views or any gig, for that matter.

You can read the reviews just by choosing the gig you want and then scrolling down.

Make sure to check the "Most Recent" reviews as that's what matters.

Here's the first one I came across when looking for high retention views:

**3 Reviews** ★☆☆☆☆ 1.0 MOST RECENT ▼

Seller Communication ★☆☆☆☆ Service as Described ★☆☆☆☆ Would Recommend ★☆☆☆☆

**Robertkalil** ★☆☆☆☆  
Cancelled order. Seller failed to deliver on time  
about 2 months ago

**Devinoutfleet** ★☆☆☆☆  
Cancelled order. Seller failed to deliver on time  
about 2 months ago

**Kartherma** ★☆☆☆☆  
Cancelled order. Seller failed to deliver on time  
about 2 months ago

**Select "Most Recent"**  
To see what others are saying about the gig you're looking at

**Looking at this gig you can this is one to stay away from... Hence why you should always read the reviews**

So as you can see...

Ordering without reading the reviews is a really bad idea.

So get into the habit to avoid disappointment - or worse - being ripped off.

### **Part 3: Rinse and Repeat**

So you've bought your high retention views, you're probably thinking what's next, right?

Well, it's just a case of rinsing and repeating the entire method again.

Obviously, you can use the same affiliate offer so you won't need to find another one.

**Just do the following:**

1. Make another video
2. Research another keyword

3. Optimize and boost your video with high retention views again.

...And that's it, really.

And believe me, you'll do it in a fraction of the time compared to the first time you did it.

In fact, I reckon you can rinse and repeat the entire method within 30 minutes.

That's how long it takes me to go through the entire process anyway.

So keep at it and you'll notice the views will build up over time.

**And as the views come in... The sales soon follow :-)**

I've actually shared this particular method, and everyone I teach it to makes money everyday with it.

So it definitely works... Just gotta put it into action, that's all.

**Would You Like To Know How To Make \$7,564.56 In JUST 29 Days  
With ZERO Experience?**

I'm gonna hedge a bet and say you do.

I mean, you wouldn't be subscribed to my newsletter and checking out my training, would you?

Anyway...

when you click the button below - I'm gonna share something very special with you.

**In fact, here's what it'll do for you:**

**It's designed to take you step by step through the ENTIRE process on how to make a full  
time, passive income online in the QUICKEST and EASIEST way possible.**

Seriously, anyone - regardless of experience - can get results with this... And you'll see EXACTLY what I mean when you're on the next page.

So if you REALLY want to ramp things up and start earning money in the quickest and easiest way possible... Then there's no better option than this, period.

**So how do you get your hands on it?**

It's really easy - mind-blowingly easy!

All you gotta do is simply give that button below a click and you'll be teleported there instantly

See you on the other side!

## STEP 10 - Choose the BEST way to make a full time income online

We're here. If you made it this far, you have a PROVEN system to generate traffic and sales to any offer you want.

Remember to just rinse and repeat. Do this once a day - twice a day, if you can!

**Be patient and persistent. You'll see results faster than you might think.**

Remember, right now it might take you 4 hours to do this. But as you repeat it, you'll do it quicker and quicker..

**...Until you're only working four hours PER WEEK and making more than you could imagine!**

I remember when I first started out...

You come into this with full of optimism, but over time, it turns into jaded skepticism.

You try all these courses, formulas, systems etc, but they simply don't deliver.

I mean, I'll be honest with you, I've blown thousands on these things.

But get this... Not one of them made me a single cent in profit.

I bet you know the feeling, right?

Thankfully, I was able to find a way through all the BS and scams out there.

So what did I do?

**Well, it was very simple, actually...**

You've gotta find someone who actually walks the walk and copy them

You see, most of these "gurus" haven't got a clue what they're about.

They just make money selling you these "systems".

Thankfully, I was able to find someone to show me how it's really done.

And not only that, walk me "step by step" through the ENTIRE process.

That's why I'm gonna recommend the guy who showed me the ropes.

**As in, took me from ZERO to making up to "\$600 a day" online.**

So if you're serious about it, then this is genuinely your BEST option:

**And look, I know EXACTLY what you're thinking...**

It's just some other BS scam like all the other crap you've tried before.

I mean, I thought the same too. But you know what..?

I took a leap of faith - and long story short - it's paying off MASSIVELY now.

**End result: I'm now making anywhere from \$200 - \$600 a day doing this.**

And not only that, it runs on complete automation!

So this money comes in regardless if I'm sitting at the computer or not.

**In fact, the only time you work is to grow your income - never to maintain it.**

Looking back, the only regret I have now is that I wish I found this guy earlier!

So please, don't be a fool like I was, and invest in the RIGHT person.

Otherwise, you're literally flushing money down the toilet like I did.

Remember what I said earlier in the book? Making money online is about PRINCIPLES and PROPER GUIDANCE.

If you're dead serious, then there is no better guide!

And hey, if you've got any questions about this, feel free to hit me up.

Like I said, this is what **I use myself** so I'm more than happy to help :-)

Checkout my #1 method of making a full-time income online

You can get it below if you haven't yet:

If I was just starting out and wanted to make money TODAY, this is what I'd do...

I already have my business up-and-running and this is what I still do to grow it month after month, like clockwork.

**Trust me: this changed everything for me, and I'm pretty sure it will for you too.**

Providing you put it into action, that is 😊
