Circa 2016

\$100 LEGACY WEALTH Solution

Super COMPOUNDING Automation

How It Works...

Unique opportunity to have multiple 3, 5 or 7 year DeFi Staking contracts which **COMPOUND daily.** Anonymity is the reason this has been in operation since 2016.

A contractual agreement will exist between a wallet holder, insurance company and bank. All parties are anonymous.

Legacy Wealth with ©CRYPTEX

\$100 FINANCIAL SOLUTION

> VISIT THE INFORMATION PAGE WITH VIDEOS HERE <

You are going to learn some Key Benefits of being associated with the **Cryptex** Project

Cryptex allows you to *benefit* from a starting balance of:

\$30,240 or \$43,200

and only pay a \$100 activation fee!

Disclaimer: What you hear in this presentation is not financial advise. It is to present you with information. Everything is associated with risk, even your J.O.B. Never risk more than you can afford to lose. There are no guarantees of income. You are responsible for your decisions and transactions. Income examples are estimates of what you may earn.

- Cryptex is a community based project, where operation is anonymous. There is no CEO, company, business or location
- Cryptex utilizes a blockchain based **DeFi Staking** protocol as it's point for earning
- Cryptex maintains partnerships with banks, insurance companies, and individual account holders (participants), working uniformly to generate profit for all parties involved
- Cryptex provides anonymity for all parties
- Operating since 2016
- There are over **500,000** account holders (participants) worldwide

The Players:

DeFi Staking Contracts

Account Holder (Participant) -

Insurance Company

Banks

LET'S TALK ABOUT THE BASICS

Background Method Of Earning: DeFi Staking – What is DeFi Staking?

It is the process of keeping your assets in a smart contract in exchange for the **accumulation of interest**. Crypto assets are locked for a contractual period of time in order to generate passive income.

Locked assets protects the blockchain network's ability to generate crypto profits, and as a reward, the staker/participant receives returns.

DeFi-Staking is considered the modern 'savings account,' but much more lucrative because daily rewards are possible with staking. Cryptex averages a variable **0.1% to 0.3% per day** from staking, and *compounds* the interest daily for profitable returns.

What Is The **Product/Asset**?

THE DEFI-HYBRID CONTRACT

A DeFi hybrid contract consists of two parts:

1. Smart contract - code that runs exclusively on the blockchain

2. A Decentralized oracle network(s) which are secure off-chain services that <u>support</u> the smart contract

This is the contractual agreement between the **contract**, the **insurance company** and the **bank**.

The Contract contains the provision of capital in USD (which is the starting balance) given *by* the **bank** *to the* **contract**, for a term of 3, 5, or 7 years.

Users activate a contract. Each contract has a non-refundable activation fee of only \$100 USD, (deposited in cryptocurrency/Bitcoin or Bitcoin Cash) which is used for distribution and inter-system operations.

Account Holder (Participant)

To Participate:

With only a **\$100 USD** activation fee, you can secure a **3**, **5** or **7** year DeFi Staking Hybrid Contract, which contains a *Starting Balance* of:

\$30,240 for 3 years \$43,200 for 5 years \$43,200 for 7 years

These starting Balances Compound over the length of the term Each participant is a considered an **Account-Holder** and may open an account anonymously with just an email address upon registration

The Insurance Company:

Insures the wallet for loss and default, and was developed by the partner insurance company *specifically* for the Cryptex project.

Why would the insurance company do this?

The insurance company stands to **benefit financially by receiving secure monthly bonuses** from the staking profits of every single Contract. They receive this *without interruption*, for the entire term of the contract.

This is automated, removes the human factor, and assures that they can collect.

The **Bank**:

Based on the insurance coverage, **the partner bank they work with provides the capital** for the Contract (3, 5 or 7 years).

Why would the Bank do this?

The bank benefits financially by receiving secure <u>annual</u> interest from the staking profits *without interruption*, for the entire term of the contract.

This is automated, removes the human factor, and assures collection.

What Does This All Mean For You?

IT MEANS, BECAUSE OF THESE **<u>4 COMPONENTS</u>**, PROFITS CAN BE GENERATED, WITH THE ADDITION OF COMPOUNDING!

LET'S TAKE A LOOK AT THE CONTRACT EXPECTATIONS AND THE

1. DeFi Staking Contract

2. Account Holder

3. Banks

4. Insurance Company

POWER OF COMPOUNDING!

Bank

User

43.200.00

\$2.376,00

So you can see there is a substantial payout difference with a **36-Month** or **60-Month** Contract

ONE **36-month** Contract is estimated to return: **\$35,097.28** in profit for the account holder

ONE 60-month Contract is estimated to return: \$471,487.00 in profit for the account holder

Each Contract **COMPOUNDS daily** interest on the *starting Balance* and averages between **0.1% and 0.3%** per day or higher (variable)

For the same \$100 activation fee!

You can have multiple Contracts

You are not limited to 1 Contract!

80 Contracts are now allowed per account and only ONE account is allowed per user

Special Package allow you to get 15 free contracts

Thank you! That is great news.

How many maximum Contracts would be possible for an account holder to have if they didn't make a request?

Putting It Altogether

- Account holder has a Contract (example: 1 contract \$100)
- The Bank provides the capital to the DeFi Staking contract
- Staking generates daily compounded profits
- Each Contract is insured by the Insurance company
- At the end of a contract term, the capital lent to the DeFi Staking Contract is *paid back to the Bank*
- All parties stand to profit from **each** and **every** Contract
- The account holder (participant) only takes care of a \$100 USD activation fee for this ENTIRE PROCESS!

Cryptex Contracts Each Contract is \$100 regardless of the length of time

MOST ASKED QUESTION:

Can I withdraw at any time during the staking term?

Profits are locked for the staking term. Generated profit from staked income is available for withdrawal **when the contract reaches the completion of it's duration**, *not before*. Profit is able to be generated upwards of \$35,000 and higher, due to the compounding that takes place during the staking period ^{CO}

To earn instantly, you can share the project with others and withdraw anytime you have a balance of \$100 or higher.

? Where does the money come from?

Banks loan the starting balance to the DeFi Staking Contract.

DeFi protocols earn through it's lending use during the time staking pool is locked. Fee's are gained during the lock up period and in turn can be allocated to daily profit results.

Based on the starting balance, funds are generated through DeFi Staking and <u>COMPOUNDED</u> 0.1 – 0.3% per day, 24/7 for 36, 60, or 84 months without let up.

The ending balance is the result after the staking time frame.

? Why would Cryptex only charge \$100 per Contract for such a return?

All parties involved, Cryptex, the bank, the insurance company and you as the account holder, earn substantial profits on <u>each and every</u> Contract purchase.

A \$100 handing fee is all that is required from the account holder, because **the bank earns** a **6.75% per year** variable interest rate on <u>each and every</u> 36-month Contract, and a **5.5% per year** variable interest rate on <u>each and every</u> 60-month Contract.

The **insurance company** earns a **\$210.00 per month** insurance fee for <u>each and</u> <u>every</u> 36-month Contract and a **\$300 per month** insurance fee for <u>each and every</u> 60-month Contract.

P P How can Cryptex pay out above and beyond the \$100 handling fee charged?

Cryptex Earns: 36 Month Contracts: \$30 - Total: **\$1080** 60 Month Contracts: \$30 - Total: **\$1800**

Bank Earns: (ONE Contract) 36-Month Contract \$30,240 at 6.75% interest x 3 years is: **\$6123.60**

60-Month Contract \$43,200 at 5.5% interest x 5 years is: **\$11,880.00**

Insurance Company Earns: 36-Month Contract: \$210/mo - Total: \$7560 60-Month Contract: \$300/mo - Total: \$18,000

Imagine you have 15 Contracts:

INSURANCE Company ALONE EARNS:36 Months (15) Contracts: \$113,40060-Months (15) Contracts: \$270,000

? Can I sign up my family?

Yes you can, but you may not place referrals underneath a family members account in order to 'stack' referral commissions.

Family members must be placed under **YOUR referral link only!**

They need to register with their own email address and Bitcoin wallet address.

You can build your downline by referring members to your own account.

This is strictly enforced, so please do not take a chance in which you could lose your account being caught stacking.

? Can I refer and earn commissions without my own Contract?

No, in order to earn, you must have at least (1) \$100 Contract yourself.

? How long does it take to receive a withdrawal?

After requesting a withdrawal, it may take up to 72 hours to receive a **confirmation email** if you made this request. You must **reply YES** to receive your withdrawal

Receipt to your crypto wallet is within 12 to 72 hours after replying to the confirmation email

When trying to login in, why do I sometimes get a message that I am 'still logged in'?

When this happens it means you didn't log out of your last lesson.

Wait a 30 to 40 minutes and try again.

When logging in from a mobile device, enter your email and password and do not click 'Login' – allow the platform to log you in automatically.

? Why does the website say Contracts sold out?

The Contracts being referred to are former Contract plans which Cryptex no longer offers.

The current website is no longer being updated since they are working on a new website and back office.

If Cryptex is running since 2016, why is the website registered in 2021?

This is when Cryptex was brought online with a website and back office, prior to this Cryptex was not operating publicly.

? How is Cryptex legitimate if we don't know who is behind it?

There is Blockchain transparency on every single transaction, and Contracts executed on the Blockchain are irrefutable and stored in a distributed database which cannot be changed or tampered with. Payments and withdrawals proceed uninterrupted.

Past experience in companies having a visible CEO has proven time and again that this has no bearing on the legitimacy of a company or business.

The appeal of Cryptex is the anonymity of all parties. This lends to the independence of a frontier project without interference.

Validation Points:

Commissions:

Immediate commission payouts are *MORE* than what is paid in. For example, instantly available Bitcoin commissions on a \$100 Contract, *pays out a minimum of* \$140 in upline commissions. This would be a ludicrous commission structure which would collapse very early on. This ONE factor alone provides validation that Cryptex operates successfully with their 4 unique components.

Limitation on Deposits:

Cryptex limits the allowed number of Staking Contracts per member (80 Contracts). So there is a strict limit on how much can even be paid into the system. This is the *opposite* of how most companies operate. Most companies welcome as much money as you wanted to put in, and never limit deposits. Limitation on deposits, reduces risk.

Blockchain Proof:

The blockchain is irrefutable. Thanks to deeper research into just ONE Cryptex Bitcoin wallet, there is video proof of an interesting discovery: **Billions of dollars in transactions** - in just *one* of the many Cryptex wallets!

Payment Proofs:

There is verification provided from long term members of very large withdrawals to completed contracts. Bitcoin payments we've seen are in the hundreds of thousands of dollars.

FURTHER BENEFITS:

Anonymity Protection:

Cryptex is able to run undisturbed with anonymity. Only an email address is required to open a Cryptex account, and only a Bitcoin wallet is required to receive your payout. This prevents vulnerability for the receiver, and represents the best kind of security, in which there can be no interference by a 'controlling' party. That is something rare and significant.

Logic

Cryptex has been internally consistent 100% of the time. That means, no internal contradictions have been identified. Any complaints found online, are not correct or are from an entirely different project that uses the Cryptex name. Example: Cryptex Finance: (different operation)

O Better Than We've Ever Seen Before:

Why are people flocking to Cryptex? **ALL OF THE ABOVE**! It's unique, original, profitable, secure, and has never been done before in any space.

CONCLUSION: It's hard to look at anything else when you know these bulletproof credentials. We are part of a very exclusive group of people who are utilizing a virtual platform for compounding rewards. Take advantage, and max out your passive income, especially while the 15 Contract special is still available!
