

## Systeme.io Reviewed: Is it Worth Your Money?

There is no escaping the fact that if you're building a business online, you're going to need tools... which means that you'll need to cough up money to buy a page builder, pay for email marketing software and so on.

Until now, there was absolutely no way for a beginner to build a business online with \$0... But Systeme.io has changed all that. Asking yourself if it's 'worth your money' is the wrong question - because the free plan is outstanding. At one glance, these are the features included in the free plan:

- ✓ Email Autoresponder
- ✓ A/B testing
- ✓ Data & analytics
- ✓ Drag-and-drop page builder
- ✓ Courses
- ✓ Sales funnels
- ✓ Order bumps
- ✓ 1-click upsells

- ✓ Coupon codes
- ✓ Automation rules
- ✓ Workflows & tags
- ✓ Blogging platform
- ✓ Communities
- ✓ Assistant accounts
- ✓ Affiliate management system
- ✓ Membership site builder

Can you build an online business with \$0? With Systeme.io, now you can! We were blown away to see how much they were giving away for nothing. Unlike 99% of free trials online, Systeme's free plan is free forever. Any competent beginner can leverage Systeme.io to build their online business from scratch paying next to nothing!

**You absolutely MUST tap into the power of [Systeme.io](https://systeme.io)!**

It's almost unbelievable. You only need to upgrade when you've hit your limits on the free plan.

But by then, you'll be in profit (if you do it right) and will easily be able to afford that Systeme.io subscription.

Now let's look at something more important... There are several factors that most experienced marketers consider when purchasing software online. Some of these are:

- Price
- Alignment with your
- Features/benefits
- Support
- Scalability
- Customization/Flexibility
- Integrations

## **1. Systeme.io's free plan is outstanding!**

The image below will show you exactly what you're getting just for signing up. You don't even need a credit card, and as mentioned earlier... it's free forever.

The astute marketer will realize that this benefit alone is enough for them to sign up with Systeme.io because there's nothing to lose.

As we've already established, you can get on the free plan - so price isn't an issue.

However, if you wish to get more features and higher limits, you can choose to upgrade to the Startup plan (\$27) a month or higher. Systeme.io is far more budget-friendly than tools like ClickFunnels (\$97/month) or Kartra (\$99/month).

You'll see many marketers recommending ClickFunnels, and for some strange reason, it has almost reached cult-like status...

But the hard truth is that this platform gets mentioned the most because the marketers recommending it are affiliates for ClickFunnels.

There's a vested interest here. Most beginner marketers are usually on a tight budget. They balk at having to fork out \$97 a month when they're not making a cent.

Since it takes time for a business to gain traction, they may have spent hundreds of dollars before making their first sale! You are definitely better off with Systeme.io.

It has all the tools you'll need to build the foundations of a thriving online business, and you can do it all for free.

## **2. Systeme.io is User Friendly**

Systeme was designed with the beginner in mind. The tool is easy and almost intuitive to use. While there is a learning curve, it's a short one.

The drag-and-drop page builder and pre-made blocks will put your page creation process on steroids. If you go through Systeme's free certification course, you'll understand how the platform works. In 2-3 days, you'll be using it like a pro.

## **3. Seamless, convenient integrations**

The beauty of Systeme is that it's an all-in-one platform. The old school way of marketing will be to get a page builder... learn how to use it... build your pages...

Then sign up for an autoresponder... learn how to use that... then tear your hair out figuring how to integrate the two different tools... and so on. It's a tech nightmare! The tech setup and struggles are what hold most beginners back.

The good news is that since everything is on Systeme.io, with just a few clicks, you can:

- Integrate your landing pages with your autoresponder.
- Your buy buttons can be integrated with PayPal or Stripe.
- Your files can be delivered to your customers with automation
- And much more!

It's so easy that you'll be amazed at how fast you set it all up. This will give you more time to focus on your marketing rather than running amok in fiery, tech hellscape.

#### **4. Systeme.io offers essential business features**

To build a business online, you'll need to sell products, build a list and so on. The fundamentals must be in place if you want to succeed. Most beginner and intermediate marketers will realize that Systeme has it all.

In fact, many experienced marketers are ditching the more expensive platforms for Systeme.

Here are just some of the things you can do on Systeme.io's free plan:

- Sell information products and online courses
- Build beautiful, high-converting sales pages
- Design and implement sales funnels

- Boost sales with upsells and order bumps
- Conduct A/B split testing for optimization
- Process payments using PayPal, Stripe, RazorPay, etc.
- Offer coupons to give discounts
- Cultivate leads through various strategies
- Execute email marketing campaigns
- Establish and manage an affiliate program
- Build a blog for content marketing
- Operate membership sites for recurring income
- And much more

 <p><b>Unlimited emailing</b> Send unlimited emails to all of your contacts</p>	 <p><b>Unlimited file storage space</b> Add an unlimited number of files to your webpages</p>	 <p><b>Unlimited students</b> Other platforms limit the number of students you can have</p>
 <p><b>No transaction fees</b> Accept payments using Stripe or PayPal at no extra cost</p>	 <p><b>Affiliate programs</b> Set up, manage, and integrate your own affiliate program with your funnels and websites</p>	 <p><b>Online support</b> Feel at ease knowing there's a real person helping you out</p>

## 5. Systeme.io is budget-friendly

You could pay for individual tools and services such as:

- OptimizePress or ThriveThemes to build sales pages...
- Aweber or Mailchimp to send emails...
- Upfluence for affiliate marketing program...

□ Teachable to host your online courses...

□ MemberPress for your membership sites... OR... you could use SYSTEME.IO to do it all for you!

## 6. Free file storage

Store your images, downloads, etc. on Systeme without having to pay for external tools such as Amazon S3 or Dropbox. More cost savings for you and it's highly convenient. The team at Systeme really thought of everything when they created this platform

## 7. Systeme grows with you (scalable)

As your business grows and you're raking in the profits, your list of email subscribers will grow, you may need more funnels than what the free plan gives you and so on. Once you're hitting your limit, you can upgrade your plan.

This makes Systeme scalable. You won't have to 'move house' just because the tool can't keep up with you. Systeme.io will be there for you when you're a newbie with \$0... and it'll be there for you when you're making six figures. It's that good.

Firstly, you'll need to sign up for a [free account with Systeme.io](#)

## 8. Helps you build your presence online

This feature really impressed us. You can even build a respectable looking blog on the free plan! The best part of it all is that you won't need to deal with WordPress and plugins and all the other hassles that come with creating a blog.

Systeme's method of blog creation is very neat, organized, and simple. So you don't need to set up a separate blog. You can do it all on Systeme.

## 9. Systeme is here to stay!

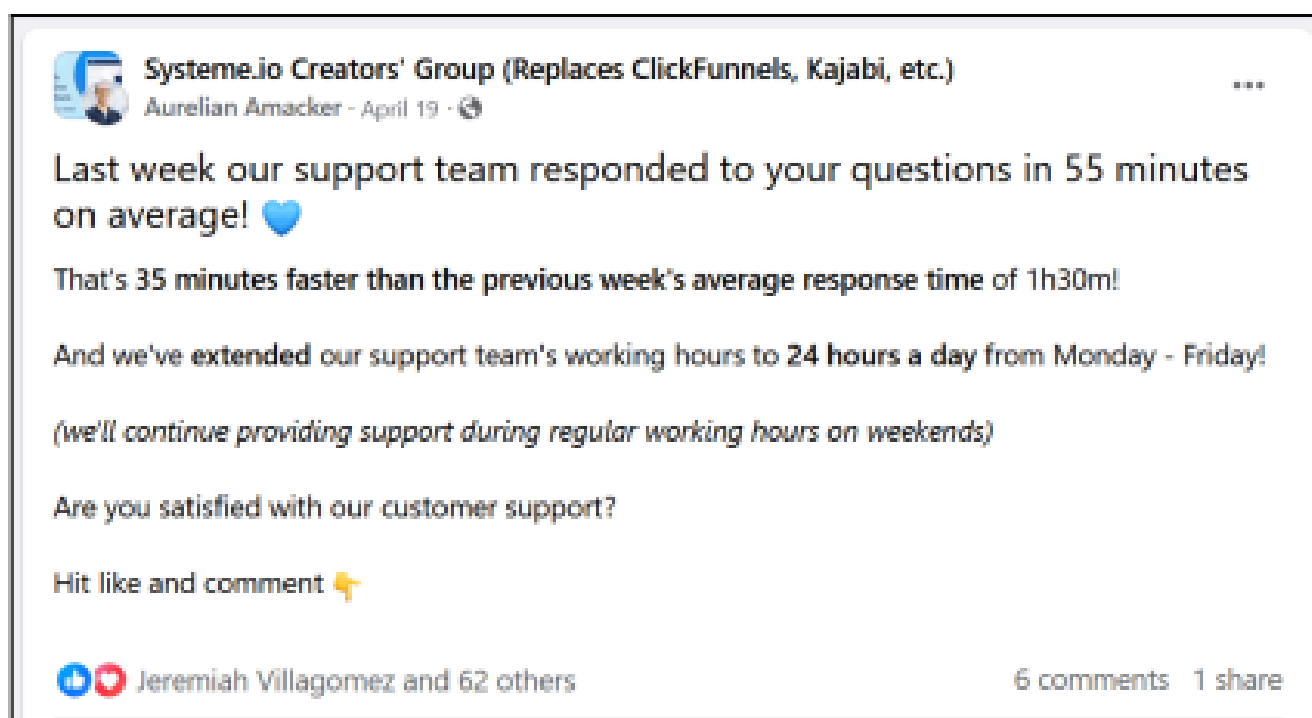

When it comes to aesthetics and design features, page builders like OptimizePress are slightly superior to [Systeme.io](https://www.systeme.io) because this is what they specialize in.

There are many cheap tools/software sold by fly-by-night vendors. They're here today and gone tomorrow. The tools are not supported and break down after a while.

Support is non-existent because the vendor has run off to profit from his next short-lived venture... and you'll be left stranded. Systeme.io is here to stay. If you did a quick search on Google Trends, you'd see that this tool is skyrocketing in popularity!

### 10.24/7 email support & awesome Facebook group

The support team at Systeme is phenomenal. In fact, the founder of Systeme.io even posted this on his Facebook page...

And he's right. They're fast and will do whatever they can to solve any issues you may have with the platform.

There's also a Systeme.io Facebook group that is a thriving community. They're always sharing their wins and tips about how to get the best out of the platform. The group is free to join... so do join it.

### Now let's look at the disadvantages of Systeme.io...

No tool is perfect and neither is Systeme. It has its limitations, but overall, it's still an awesome tool. • A Jack of all trades... but a master of none. One downside to Systeme.io is that it's a generalist.

So what does that even mean? It means that while it's an all-in-one platform that gives you a ton of features, each feature has its limitations. It doesn't specialize in any one feature. For example, the drag-and-drop page builder in Systeme is great and you can create high-converting sales pages with it... BUT... if you compared it to a tool like OptimizePress 3.0 (OP3), it pales in comparison.

OptimizePress has far more advanced page building features. But this is understandable because that's what the tool focuses on. You can build gorgeous pages with OP3 but you can't do email marketing with it.

With Systeme, you can do both... though your pages won't look as fantastic as they would with OP3. Similarly, while Systeme.io has a built-in autoresponder... the tool is nowhere as advanced as popular autoresponders such as ConvertKit which has a lot more segmentation features and so on.

That said, ConvertKit allows you to send emails... but you can't build a blog on it. Once again, with Systeme, you can do both. Do you see where we are going with this? Systeme.io is like a Swiss Army Knife of marketing tools.

You can still do a lot with it and easily build a business up to six figures - but if you want more comprehensive or advanced features you'll have to pay a lot more for 'specialized' software. Once you're in profit, you can decide if you wish to use other tools.

But if you're a beginner or your business is below six figures a year, it's more cost effective to use Systeme.io. • All your eggs are in one basket Since you'll be using all the different tools in Systeme for your marketing, if the platform goes down, your business will be brought to a standstill.

However, the same applies for any other all-in-one platform such as ClickFunnels, Kartra, LeadsLeap, etc

While other marketers are paying for hosting, WordPress themes, plugins and so on... [Systeme.io](https://www.systeme.io) allows you to build one blog on the free

plan.

The good news is that Systeme is highly reliable and hardly ever down. So there's nothing to worry unduly about.

One point to note is that if you're building a blog on Systeme.io, you'll need to keep being a member of it for your blog to stay up. Even if you're a free member, it's fine... but if you wish to move your entire blog to a new host, it can be a hassle and you'll need to contact Systeme's support team to get it sorted out.

In the end, it boils down to a compromise where you're trading 'independence' for practicality and ease of use.

You'll have to decide for yourself which way to go. Despite both these limitations, Systeme.io is still the best choice for most beginner marketers who are on a tight budget or struggle with the usual tech headaches common with most other tools.

Systeme.io is affordable, easy and fast. Period. • So... what now? The answer is obvious. With all the benefits and features available on Systeme, you'll definitely want to try it out.

This is a no-brainer because there's zero risk for you. Sign up for the free plan and give it a spin. We're betting that you love the platform and never look back. Never has there been an easier and almost free way to build a business online.

You may wish to pay about \$10 or so to buy your own domain name from Namecheap so you could add it as a custom domain. If you already have a domain with an email address, you could just add that. Imagine having an opt-in funnel, a list of subscribers, sales pages for your products and much more while paying \$0 a month!

That's exactly what you'll get with Systeme.io. It doesn't get better than this. Get your free account and start building your online business empire today - quickly, inexpensively and effortlessly.
